#### COVER LETTER

May 5, 2025

Chief David Rudat City of Manteca 1001 W Center Street Manteca, CA 95337

#### RE: Program Management Services for Manteca Fire Station 6

#### Dear Chief Rudat,

Griffin Structures is pleased to submit our proposal to the City of Manteca to provide program management services for the development of Fire Station 6. As the City continues to enhance its public safety infrastructure, we are proud to build upon our current work managing the new Manteca Police Department by supporting the successful planning and implementation of this critical fire facility.

We understand that the City is seeking a phased approach to meet both immediate operational needs and long-term fire service demands. Our proposed scope includes a comprehensive needs assessment to define programmatic requirements, procurement support for architectural services, and full design management oversight to ensure cost, quality, and schedule alignment. If desired, we are also positioned to extend our services into construction management during future phases.

#### WHY GRIFFIN STRUCTURES?

#### 1. Ongoing Partnership with the City of Manteca

Griffin is currently serving as Owner's Representative and Project Manager for the new Manteca Police Department. This active engagement gives us a direct understanding of the City's internal processes, project delivery preferences, and public safety priorities—allowing us to integrate seamlessly into the Fire Station 6 effort.

#### 2. Proven Fire Facility Experience Across California

We bring a strong portfolio of successful fire station projects statewide, including:

- » The newly completed City of Orange Fire Headquarters & Station 1
- » The resilient and modern Manhattan Beach Fire Station 2
- » The efficient, high-volume Buena Park Fire Station 61
- » Additional fire and emergency facilities throughout the state that prioritize operational effectiveness, firefighter wellness, and long-term maintainability.

#### 3. Full Life-cycle Public Facility Management

With over four decades of experience, we specialize in managing complex civic projects from concept through closeout. Our process combines technical expertise, fiscal discipline, and proactive communication to protect the City's interests and deliver superior results.

#### OUR COMMITMENT TO THE CITY OF MANTECA

Fire Station 6 represents an important investment in the City's future. Our team is committed to providing thoughtful analysis, efficient project execution, and unwavering support throughout every stage of development. We are honored by the opportunity to continue serving the City of Manteca and are ready to begin work immediately. Please do not hesitate to reach out with any questions.

Sincerely,

Dustin Alamo, CCM, LEED AP, DRE Broker #01930629 Vice President & Preconstruction Manager (408) 955-0431 x263 | dalamo@griffinstructures.com 1 TECHNOLOGY DR, BLDG I, SUITE 829 | IRVINE, CA | 949.497.9000 | GRIFFINSTRUCTURES.COM

# And the second s

# Team Organization

In order to offer the highest value to the City, we have included a highly experienced, comprehensive team of individuals to provide specialty services for this project. We hereby confirm all of our proposed team members are able to perform the services as listed in the RFP.

As Principal-In-Charge, Robert will provide oversight and support to Dustin Alamo and team. Dustin Alamo will have overall responsibility for the work, providing guidance to the team through the preconstruction activities. Project Analyst, Hailey will support Dustin Alamo with all civic programming components. As Cost Estimator, Ryan will provide estimating and value engineering services to ensure your fiscal objectives are achieved from inception to completion. David Fields, Constructability Reviewer, will review the program to best mitigate potential impacts and offer alternative means or methods in achieving client goals.

Please refer to the following resumes to view the education, experience, and credentials of our proposed team.

Robert Godfrey ccm Principal-In-Charge

#### EDUCATION

Bachelor of Science, Management, The Georgia Institute of Technology, Atlanta

#### CERTIFICATIONS

Certified Construction Manager (CCM)

#### AFFILIATIONS

#### QUALIFICATIONS

Robert Godfrey brings more than 20 years of combined experience in construction management and planning. As a construction manager, he has been involved during all phases of development and construction. His responsibilities as a project/construction manager have entailed pre-construction services, public and stakeholder outreach, managing entitlement and plan check processes, obtaining building permits and coordinating inspections, and generating punch lists and overseeing project closeout. Robert has a proven record of project management involving effective communication with design team members, coordinating consultants, vendors and contractors all to assure the client's goals and objectives are achieved.

# Manteca Police Department Headquarters

MANTECA, CA

#### DESCRIPTION

Griffin Structures is serving as the Owner's Representative for the City of Manteca in the development of a new 50,000-square-foot police headquarters. The facility is designed to unify the department's core functions including administration, patrol, investigations, dispatch, and support—into a single, purpose-built campus that meets modern law enforcement standards and accommodates future growth.

Our services include managing the programming and design phases, facilitating coordination between City staff and the design team, and ensuring that the project remains aligned with the City's goals, budget, and schedule. Griffin's leadership has focused on driving clarity in space planning, overseeing milestone deliverables, and supporting the City with strategic decision-making throughout the preconstruction process.

# Orange City Fire Department Headquarters

ORANGE, CA

#### DESCRIPTION

Griffin Structures oversaw the development of the Orange City Fire Department Headquarters, which services the Old Towne Section of Orange. The new station is substantially larger than the former building. The campus provides firefighters with a more spacious vehicle bay, equipment maintenance and storage areas, training facilities, and Fire Department administrative offices.

Most importantly, the new station provides space and technology for the Orange City Fire Department, offering updated equipment, space flexibility, and administrative offices to continue their mission of providing the citizens of Orange superior service well into the 21st Century.

Given that the project site is within the Old Towne Orange Historic District, the architecture compliments the City's historical Craftsman to Mission/Spanish Revival to Classical Revival style. Due to a strong community interest in the design and construction of this facility, the project also incorporated a robust series of local community outreach meetings to solicit input from residents.

#### VALUE + SIZE

# Buena Park Fire Station No.61

BUENA PARK, CA

#### DESCRIPTION

Griffin Structures served as the Program and Construction Manager for this 18,000 SF facility, including early programming and phasing analyses to relocate the station to its new site. The facility houses OCFA firefighters as well as administrative offices, serving as a battalion and OCFA Division 7 headquarters.

The facility features three fire apparatus bays with quick-opening bi-fold doors and a signal interrupter. The station also includes training rooms and office space, 14 dormitory sleeping quarters, kitchen and dining facilities, and a workout room. The large training room is equipped to operate as an Emergency Operations Center. Exterior features include a generator to power the building in the event of a power outage, an apparatus wash area, a dual-fuel fueling station, and storm water capture and filtration including pervious paving in the parking areas.

The design incorporates a pre-engineered metal building structure with an insulated metal panel roofing system, resulting in accelerated delivery and significant saving over traditional fire station construction. The project was delivered on-schedule and under budget.

# Manhattan Beach Fire Station No.2

MANHATTAN BEACH, CA

#### DESCRIPTION

Griffin Structures provided Program and Construction Management for this project five years in the making, which included Griffin Structures' early analysis for the city in 2016 and then again in 2017. The resulting two-story fire station boasts a modern design, nearly three times as large as the former station, which was demolished to make way for the new building.

The re-imagined station is home to six crew dormitories, dining and exercise room, locker space laundry room, medical storage, and office space for administrative duties. The new building is also earthquakeproof, includes a shop area and is large enough to accommodate a modern apparatus bay. A trash enclosure and backup power generator are also included, as well as new hose tower and gated parking lot to accommodate for future fire station growth.

# Cathedral City Fire Station No.411

CATHEDRAL CITY, CA

#### DESCRIPTION

Griffin served as the Construction Manager for the new 8,500 SF fire station in Cathedral City. Station 411 includes three apparatus bays, living quarters, as well as support and storage areas. The station is set on a three-acre site which also includes development of a future Cathedral City Dog Park. The site includes training and recreation spaces as well as separate public parking and secure employee parking areas. Back-up utility facilities servicing the fire station ensure uninterrupted service. The site features native and drought-tolerant landscaping.

This Fire Station was constructed employing a preengineered metal building. Features include high-speed rapid deployment bay exit doors; firefighter dormitory accommodations and semi-private captain's quarters; a great room to incorporate cooking, dining, and living spaces; a flexible work/study area; equipment maintenance and storage areas; a public lobby and a freestanding 45' tall communications tower.

# Monterey Police Department & Fire Complex

MONTEREY, CA

#### DESCRIPTION

Griffin Structures assisted the City of Monterey to identify and evaluate options for the potential expansion, renovation, remodel and/or replacement of the City's existing Public Safety Facility.

The current Public Safety Facility is home to the Monterey Police Department (15,788 SF), Fire Station #11 (5,840 SF) and the Emergency Operation Center (1,300 SF). Initially constructed in 1959, the existing facility has received many renovations over the years with the intention to fully assess and revitalize public safety operations for the City.

A plan was developed to identify implementation costs, phasing schedules, and considerations pertaining to the continued operations of the Public Safety Facility during construction. Our team also prepared a final report to document the process utilized for selecting the recommended option and will become a resource document for subsequent environmental review including preliminary site diagrams, cost estimates, and potential funding sources.

#### VALUE + SIZE

#### CLIENT + CONTACT

City of Monterey Andrea Renny Public Works Director (831) 646-3920 renny@monterey.org

### Garden Grove Fire Department & Headquarters

GARDEN GROVE, CA

#### DESCRIPTION

The primary objective of this study was to identify and develop a master plan for the major public safety facilities in the City. The master plan addresses shortterm and long-term needs of both the police and fire department and identifies a relocation plan for the fire department to move into newly constructed fire facilities, thus allowing the police department to proceed with expansion of police facilities. The project included significant building surveys and cost analysis.

As part of the master plan study, Fire Station No.1 and Headquarters would vacate the existing public safety facilities and move into a newly constructed fire facility.

The objective of the needs assessment was to identify the space requirements for a new fire facility, which was completed through a series of plenary meetings between our project team and the fire department planning team. A detailed architectural program of space was developed to produce schematic design drawings and cost estimates for master plan integration.

# Project Approach

#### PROJECT UNDERSTANDING

The City of Manteca is advancing efforts to strengthen its fire and emergency response capabilities with the development of a new Fire Station 6. This initiative is critical to supporting the City's continued growth, improving emergency response times, and maintaining high service standards across the community.

Recognizing the urgency of addressing immediate operational needs while planning for long-term infrastructure investment, the City intends to pursue a phased approach that includes both a temporary facility solution and the design and construction of a permanent fire station.

To assist in this effort, Griffin Structures will provide comprehensive program management services that span the full project lifecycle, beginning with a detailed needs assessment, procurement of architectural services, and design management oversight. Supplemental construction management services can be provided as a future phase once the project transitions into implementation.

Our scope includes:

- Needs Assessment: Analyze short-term and long-term operational, spatial, and functional needs to inform facility programming for both temporary and permanent station solutions.
- Procurement Management: Develop and manage the Request for Proposal (RFP) process to procure architectural and engineering services aligned with the City's goals, ensuring a transparent and competitive selection process.
- Design Management: Serve as the City's advocate and technical advisor throughout the design process, ensuring that the project remains aligned with operational objectives, cost parameters, schedule expectations, and design excellence standards.

Griffin Structures will act as an extension of City staff, providing hands-on leadership, proactive risk management, and critical path tracking to ensure the Fire Station 6 project is successfully advanced with transparency, collaboration, and accountability. Our team brings extensive experience in fire station programming, design oversight, and municipal capital project delivery, positioning us to help the City of Manteca deliver a facility that meets today's operational needs and tomorrow's community expectations.

#### SCOPE OF SERVICES

#### **Project Management Approach**

With over 44 years of experience, Griffin has established itself as a leading provider of project management services, particularly in public safety project development. Our extensive background includes various project delivery methods such as design-bid-build, design-build, progressive design-build, and public-private partnerships (P3), enabling us to meet the specific needs and challenges of each project. Our proven track record showcases our ability to manage design and development phases with precision and expertise.

Our commitment is to ensure the project is managed effectively, delivered on time, and within budget. We will provide comprehensive project management services, including:

- Identification of Critical Path Tasks and Key Benchmarks: Defining essential milestones and deadlines to maintain project momentum.
- Direction on Best Practices: Providing expert advice on executing critical tasks efficiently and effectively.
- Development of Strategy: Crafting a robust strategy to ensure timely completion of all tasks. Our Vice President of Strategic Services, Dustin Alamo, will lead this project, bringing extensive experience in developing and implementing complex public safety projects.
- On-Time and On-Dime Delivery: Ensuring that the project remains within its schedule and budget constraints.
- Proactive Communication: Keeping City staff informed with clear and timely updates on any issues, scope modifications, budget adjustments, and key decision points.

A key strength of our approach is our ability to seamlessly integrate with existing teams, acting as an extension of staff

to provide full support throughout the project life-cycle. We understand the importance of aligning with the City's goals and are dedicated to delivering results that meet or exceed expectations.

#### Phase 1: Needs Assessment

Griffin will lead a comprehensive needs assessment to define the short- and long-term space and operational requirements for Fire Station 6. This foundational phase will provide the City with critical data and strategic recommendations to support near-term deployment through a temporary station solution and long-term development of a permanent station.

Key activities include:

- Operational Review & Stakeholder Engagement
  - » Conduct working sessions with Fire Department leadership and City staff to understand service demands and functional priorities.
  - » Facilitate interviews, site walk-throughs, and collaborative workshops to build consensus on needs.
- Functional & Spatial Programming
  - » Develop a detailed space program for both the temporary and permanent stations.
  - » Identify square footage needs and functional adjacencies for apparatus bays, gear storage, bunk rooms, administrative areas, and support functions.

- Site Review and Evaluation
  - » Provide feedback on the identified location for the temporary and permanent station, including feasibility, infrastructure availability, and assumed site constraints.
- Phasing Strategy & Implementation Options
  - » Provide recommendations for phased development and interim operations.
  - » Develop conceptual cost opinions and implementation roadmap.
- Deliverable: A comprehensive Needs Assessment presentation including findings, space programs, site considerations, and cost/timeline guidance.

#### Phase 2: Procurement Management for Design Services

Our team will manage the procurement process to obtain design services for the Fire Station 6 project. This task involves several key activities:

- Drafting Procurement Documents
  - » Develop tailored RFPs and procurement vehicles with clear scope, specifications, and evaluation criteria.
- Review and Evaluation of Proposals
  - » Facilitate structured evaluations and assist with consultant interviews and final selection.

- Preparation and Finalization of Contract Documents
  - » Collaborate with City Legal to finalize scopes and contract terms.
- Participation in Negotiations
  - » Support pricing and term negotiations with the selected design firm.
- Project Oversight and Support
  - » Provide ongoing management throughout the procurement phase.

#### Phase 3: Design Management

Griffin Structures will oversee and manage the design process to ensure that Fire Station 6 aligns with the City's operational needs, stakeholder expectations, and technical and regulatory standards. Our scope includes active coordination, technical review, and milestone-based oversight across all stages of design.

- Oversight of the Design Process
  - » Act as the City's representative to monitor design team progress, performance, and coordination.
  - » Maintain design review logs, issue trackers, and documentation of design decisions.
- Design Phase Coordination
  - » Conceptual Design
    - Validate initial layout and site planning concepts.
    - Evaluate feasibility, functionality, and alignment with the program.
  - » Schematic Design
    - Review spatial arrangements and stakeholder priorities.
    - Monitor preliminary cost estimates and value engineering opportunities.
  - » Design Development
    - Oversee integration of architectural, structural, MEP, and technology systems.
    - Track estimate updates and coordinate design refinements.

- » Construction Documents
  - Conduct technical reviews for completeness and bid-readiness.
  - Coordinate final document quality, permitting submittals, and contractor bid packaging.
- Cost, Schedule, and Constructability Controls
  - » Continuously monitor cost alignment through milestone estimates.
  - » Oversee development of the project schedule.
  - » Perform constructability reviews to identify and address design gaps or coordination issues.
- Stakeholder Engagement and Decision Support
  - » Facilitate structured meetings and decision checkpoints with City staff and Fire Department representatives.
  - » Provide briefing materials, summary memos, and presentations to support internal and public communication.

# Phase 4: Construction Management (To Be Initiated Separately)

Although this phase is not included in our current scope, Griffin is prepared to offer comprehensive construction management services at the appropriate time. These may include:

- Bid phase support
- · Contractor onboarding and contract administration
- · Field observation and schedule/budget tracking
- Change management and claims mitigation
- Final closeout and turnover coordination
