Mr. Somporn, Boonsalat
Deputy Director
City of Manteca
Engineering Dept.
1001 W. Center St.

Manteca, CA 95337

Re: Cost of Service Sewer Rate
Study – Draft Report

Dear Mr. Boonsalat,

Stantec is pleased to present this Draft Report on the Cost of Service Sewer Rate Study that was conducted for the City of Manteca. We appreciate the professional assistance provided by you and all of the City staff who participated in the study.

If you or others at the City have any questions, please do not hesitate to call either point of contact, listed below.

Sincerely,

A handwritten signature in blue ink, appearing to read "Sally Van Etten", with a stylized flourish at the end.

1.0 EXECUTIVE SUMMARY

This Executive Summary presents an overview of the results of the Cost of Service Sewer Rate Study (Study) that was conducted for the City of Manteca (City) by Stantec Consulting Services Inc.

ES.1 STUDY OBJECTIVES AND APPROACH

Current sewer rates and charges were adopted in 2009 and sewer rates and charges have not been updated or increased since 2010. Since then, the City recently updated its Wastewater Master Plan, which was adopted by the City Council on March 5, 2024¹. As a result, the City needed to revisit the basis of the rates and charges to sewer customers to ensure they align with the full cost of providing service and are proportionately allocated between and within customer classes. Stantec was engaged to provide a cost-of-service analysis and recommend updated rates and charges, for which the results and findings are presented herein. The primary objectives of this Study were to:

- i. Develop a multi-year financial management plan that integrates the City's capital funding needs for sewer;
- ii. Identify future rate revenue adjustments to sewer rates to provide adequate revenues to meet the City's ongoing financial requirements;
- iii. Determine the cost of providing sewer service to customers using industry accepted methodologies;
- iv. Recommend specific rate structure modifications that proportionately recover the cost of service consistent with legal requirements.²

This study used methodologies that are aligned with industry standard practices for rate setting as promulgated by the American Water Works Association (AWWA), Water Environment Federation (WEF) and applicable law, including California Constitution Article XIII D, Section 6(b), commonly known as Proposition 218.

The Study consisted of the following phases:

Revenue Sufficiency Analysis (RSA) – Develop and populate a multi-year forecasting model for the City that will determine the level of annual rate revenue required to satisfy projected annual operating costs, debt service expenses, and capital cost requirements, as well as maintain adequate reserves.

Cost-of-Service Analysis (COSA) – Utilize industry standards and principles, as outlined in the AWWA Manual, *Principles of Water Rates, Fees, and Charges, M1 (M1)*³ and WEF's *Manual of*

¹ *City of Manteca Wastewater Master Plan*, February 2024.

² Stantec does not provide legal advice. This report was reviewed by separate legal counsel procured by the City.

³ Although the AWWA M1 is primarily focused on water rate setting, it is an accepted and well-known manual providing general cost of service and rate setting guidance for water and sewer utilities alike.

Practice 27: Financing & Charges for Wastewater Systems (MOP 27), incorporate test year revenue requirements from the revenue sufficiency analysis to assess system billing determinants, allocate revenue requirements to the wastewater system's functional cost components, and identify costs allocable to the City's rate components.

Rate Structure Analysis – Evaluate the City's current user rate structure and based on the recommended rate revenue adjustments identified in the financial plan and subsequent cost of service analysis, develop recommended rate schedules to meet the revenue requirements, goals, and objectives of the City for its sewer utility.

ES.2 REVENUE SUFFICIENCY ANALYSIS

In the Revenue Sufficiency Analysis (RSA), Stantec evaluated the sufficiency of the City's rate revenues to meet all of its current and projected financial requirements over a 10-year projection period. From this 10-year analysis the level of rate revenue increases necessary over the next five years to provide sufficient revenues to meet cost requirements was determined. As part of the RSA, Stantec relied upon data provided by the City of Manteca. Stantec discussed and reviewed source data and assumptions with City staff. Several alternative capital spending scenarios were also developed, analyzed and discussed with City staff. The City determined that the selected capital scenario was reasonable, consistent with the newly adopted Wastewater Master Plan, and necessary to meet the City's sewer system capital needs.

The proposed financial plan and associated rate revenue adjustments are based upon the revenue and expense information, beginning balances, and other policies and assumptions provided by the City as described in the full report. The financial plan includes the City's 10-year capital improvement program (CIP) for sewer system improvements, which includes approximately \$223 million in projects to be completed over the five years between fiscal year (FY) 2025 and FY 2030. The RSA assumes the Water Quality Control Facility (WQCF) Phase IV Stage 1 Expansion Project totaling \$151M and also includes bond funding in FY 2026 to help partially fund the North and South Plant aeration basin improvements, sidestream treatment system project (to remove nitrogen), UV disinfection system upgrade and changing from dissolved air flotation treatment (DAFT) technology to Rotating Drum Thickener technology.

Based on the RSA it was determined that the current sewer rates and charges will not be sufficient to meet the annual revenue requirements of the system. A preliminary analysis indicated that failing to adjust sewer rates would result in insufficient funds to meet capital funding requirements to complete the City's CIP for sewer system improvements. This diagnostic analysis revealed that without rate adjustments the Sewer Revenue Fund (Fund 640) balance would fall below reserve targets and all resources would be exhausted by FY 2027 under the current projection of operating and capital costs. As a result, the RSA phase of the study set out to determine the appropriate level of rate revenue increases needed to meet the City's financial goals, including necessary capital improvements, while minimizing the necessary impacts to customers.

Based on the findings of this RSA diagnostic analysis and the data, assumptions, and policies provided by the City and discussed further in this report, a financial management plan based on a corresponding set of sewer rate revenue increases that will meet the City's projected cost requirements under the projected conditions is presented and described in this report. Several rate increase options were

CITY OF MANTECA: SEWER RATE AND FEE STUDY

Executive Summary

developed and discussed with the City. After consideration of the options presented, the City is choosing to move forward with the option that reflects an initial increase of 37% as its preferred approach because the RSA requires an increase in the first year to meet the City's planned capacity improvement and budgetary requirements. This increase is necessary because the City has not increased its rates since 2010.

Table ES-1 shows the 5-year rate revenue adjustment plan resulting from the City's RSA. The rates are scheduled to increase as of mid-May 2025. Because of the short time period between the initial rate increase in mid-May 2025 and the start of FY 2026 in July, no additional rate increases are recommended for FY 2026. Instead, additional rate increases are presented starting in FY 2027. It is important to note that while total rate revenues will increase as a result of rate increases, individual customers' bills may go up or go down due to the recommended rate structure adjustments identified in the cost of service and rate design phases of the Study.

Table ES-1: Proposed Sewer Rate Revenue Increases, May FY 2025 – FY 2030

	May FY 2025- FY 2026	FY 2027	FY 2028	FY 2029	FY 2030
Effective Date	5/15/2025	7/1/2026	7/1/2027	7/1/2028	7/1/2029
Sewer Rate Increase	37.0%	10.0%	6.0%	6.0%	6.0%

ES.3 COST-OF-SERVICE ANALYSIS

The purpose of a cost-of-service analysis (COSA) is to determine the cost of providing sewer services so that the revenue requirements of the utility may be proportionately distributed through a rate structure. The Study followed the following general sequence:

- ▶ Identify the net rate requirement, accounting for offsetting revenue
- ▶ Allocate net costs of service to the appropriate activities/functions
- ▶ Allocate the costs of each function to specific system parameters
- ▶ Calculate unit costs
- ▶ Distribute costs to customer classes based on unit costs and each class' usage characteristics

The cost-of-service analysis allocates costs to customer categories reflecting volumetric usage and wastewater loading factors for each. A cost-of-service study relies on historic usage characteristics, so the planning period reflects a "snapshot in time" that represents the current mix of customers. Because the mix of customers and customer use patterns change over time, Stantec recommends that a cost-of-service analysis should be updated no less frequently than every five years. Table ES-2 summarizes the results of the cost-of-service process in the form of revenue requirements for each customer rate class. The cost-of-service results functionally represent the revenue targets by customer class that will be used in the rate design section. Creating this cost of service to rates linkage ensures that the final rates by customer class are proportional to demands placed on the system.

Figure ES-1: FY 25 Wastewater Revenue Requirements by Customer Class

ES.4 RATE STRUCTURE RECOMMENDATION

A rate structure analysis was performed to identify potential rate structure modifications and specific rate schedules that would:

- ▶ Proportionately and equitably recover the cost of providing sewer service for each Customer Class
- ▶ Conform to accepted industry practice and generally understood Proposition 218 and other legislative requirements⁴

Current sewer rates solely consist of a fixed monthly fee for residential and equivalent accounts and commodity (use based) rates charged based on measured water usage to an additional 17 classes of customers. The City's current sewer rates are presented in Table ES-2 on the next page, below.⁵

⁴ Stantec Consulting Inc. is not a law firm and does not provide legal advice.

⁵ Rates shown in Table ES-2 do not include any senior discounts. Senior discounts are funded with penalty revenues and prior-year interest earnings.

CITY OF MANTECA: SEWER RATE AND FEE STUDY

Executive Summary

Table ES-2: Current Sewer Rates for FY 2024-25

Customer Class	Jan. 1, 2010 and Thereafter	Basis on Which Rates Charged
Residential and equivalents	\$43.30	per unit
Trailer Park	\$36.57	per 1,000 CF
Rooming houses	\$27.70	per 1,000 CF
Commercial/retail	\$30.96	per 1,000 CF
Hotel/motel	\$33.81	per 1,000 CF
Hotel/motel w/kitchen	\$61.89	per 1,000 CF
Car washes/ laundromats	\$24.53	per 1,000 CF
Service stations (metered)	\$34.04	per 1,000 CF
Office/light industrial	\$25.35	per 1,000 CF
Restaurants	\$72.42	per 1,000 CF
Markets	\$75.45	per 1,000 CF
Mortuaries	\$75.45	per 1,000 CF
Hospitals	\$32.69	per 1,000 CF
Elementary schools	\$24.06	per 1,000 CF
Secondary schools	\$28.71	per 1,000 CF
Churches	\$28.71	per 1,000 CF
Nonprofit	\$27.82	per 1,000 CF
Commercial mixed use	\$40.23	per 1,000 CF
Industrial Category	Jan. 1, 2010 and Thereafter	Basis on Which Rates Charged
Flow/Volume	\$2,023.24	per MG
BOD	\$0.404	per lb
TSS	\$0.765	per lb
Nitrogen	\$2.866	per lb

As discussed previously, this study updates the sewer rates based on the latest available data to reflect the cost to provide service to various customer categories. The analysis was completed in adherence with cost-driven rate design principles using COSA results to allocate different components of sewer system costs to customer classes based on relative use of those components by class. As part of the COSA, the City additionally wanted to review and consolidate customer classes for ease of administration and implementation where appropriate.

Rates for residential uses were updated using data consistent with updated flow from the recent Manteca Wastewater Master Plan (2024), including generally accepted engineering loading estimates for residential uses. The same flow and loading data prepared in the City's prior COSA study (2008) was used for commercial uses as more specific updated data was not available. The remaining commercial uses were combined and grouped into three categories, Commercial – Low Strength, Commercial – Mid Strength, and Commercial – High Strength, based on similar flow and loading characteristics as per the

CITY OF MANTECA: SEWER RATE AND FEE STUDY

Executive Summary

data from the 2008 study. The consolidation of commercial users into three aggregated classes is increasingly common for wastewater rates, better reflects the diversity of use and loading factors within classes and will simplify rate management practices over time.

Rates for industrial uses are often considered separately to reflect unique flow and loading characteristics, wide variance in strength profiles, increased monitoring and reporting requirements, and other legal or contractual requirements. Industrial customers are billed monthly, quarterly, or annually depending on contract and monitoring requirements, and can include requirements for self-reporting as well as direct monitoring and testing by the City. Some customers conduct pre-treatment of their effluent prior to discharge to the City; these processes are unique and can be entirely self-managed or require City involvement. Manteca Public Works assesses new industrial customers and establishes rates, monitoring, and operational requirements appropriate for the industrial processes involved. The monthly cost per flow and loading characteristic are applied to all customers based on the per million gallon or pound charges shown below.

Rates for late FY 2025 (anticipated mid-May implementation date) and FY 2026 were developed based on the updated COSA, the latest customer and usage data, and addressing the rate structure changes described above, as well as incorporating the 37% rate revenue increase identified in the revenue sufficiency analysis. Tables ES-3 shows the proposed rates for Mid-May FY 2025 through FY 2026 for the seven consolidated customer classes. The complete rate schedule through FY 2030 is provided in Schedule 1 of Appendix C.

Table ES-3: Proposed Sewer Rates for May 2025 - FY 2025-26

Customer Class	Effective Date of May 15, 2025 FY 2025-2026	Basis on Which Rates Charged
Single-Family Residential	\$58.60	per unit
Multi-Family Residential	\$41.70	per unit
Mobile Home	\$37.20	per unit
Commercial – Low Strength	\$45.70	per 1,000 CF
Commercial – Mid Strength	\$55.40	per 1,000 CF
Commercial – High Strength	\$104.60	per 1,000 CF
Industrial Class	Effective Date of May 15, 2025 FY 2025-2026	Basis on Which Rates Charged
Volume	\$3,872.20	per MG
BOD	\$0.70	per lb
TSS	\$1.00	per lb
Nitrogen	\$3.10	per lb

Abbreviations

1.0 INTRODUCTION

Stantec Consulting Services Inc. (Stantec) has conducted a comprehensive cost-of-service and rate study (Study) for the sewer system of the City of Manteca (City). This report presents the objectives, approach, methodologies, source data, assumptions, and findings and recommendations of the Study.

1.1 BACKGROUND

The City of Manteca provides sewer collection and wastewater treatment to its residents and businesses. The sewer system currently serves approximately 30,100 residential customers, (including single family, multiple-family, and mobile home residential customers), almost 1,000 commercial customers of various kinds, and six industrial customers within the City of Manteca, including industrial pre-treatment customers. Pre-treatment customers are billed separately for pre-treatment but may also be billed monthly for monitoring and for non-industrial process related sewer use. Eckert Cold Storage, an industrial customer, is charged a set rate for sewer services previously adopted by City ordinance for Eckert's process water (water that it uses as part of its production) that is not treated at the existing Wastewater Control Facility and therefore has been excluded from the COSA analysis. Eckert is currently charged for non-process water sewer services under the existing Mixed Use Commercial category.

The City additionally provides wastewater treatment services to the City of Lathrop via a contract for those services which is paid on a monthly basis. Manteca also provides wastewater treatment services to two small developments outside of city limits, Raymus Village and Oakwood Lake Water District and Oakwood Lake Water District Mobile Homes. Raymus Village is charged based on a metered flow and Oakwood Lake is billed monthly based on the City's adopted rates for single family residential units multiplied by the number of units. As separate services, revenues from these services represent an offset to the revenue requirements being addressed in this study. This analysis assumes that the estimated revenues from sewer services provided to Lathrop, Raymus Village and the Oakwood Lake District customers these special contract customers will mirror the revenue requirement increases for regular rates customers and rise by the same proportion as the corresponding applicable rates per contract.

The City last conducted a sewer rate study in 2008 and adopted and implemented an increase in sewer rates in 2009. The rates were designed to be increased annually for five years. Instead, rates were increased in 2009 and 2010 but have been frozen at the same level since that time. As a result, the rates have not been adjusted to reflect either cost of living expenses, including wages, nor for increases in the cost of construction for improvements or capital expenses required for renewal and rehabilitation. This has caused needed repairs and replacement of sewer infrastructure to be postponed, and some positions to remain unfilled due to lack of competitive salaries. The City was able to bond finance Phase III infrastructure improvements that allowed some necessary sewer system improvements to proceed. The debt payments for the Phase III improvements have been paid through a combination of monthly rate charges as well as capacity charges (also known as "connection fees") paid by new development.

The City hired Stantec engineers to develop a new Wastewater Master Plan (WWMP). The WWMP and the suggested expansion and other projects included as part of the WWMP were analyzed and discussed with City Staff, culminating in the adoption of the WWMP earlier in 2024. Expansion of the WQCF through the projects adopted as part of the WWMP and recently included in the City's Capital Improvement Plan (CIP) will approximately double the capacity of the WQCF allowing for uninterrupted sewer services for existing customers and to facilitate continued population growth associated with new development.

1.2 STUDY OBJECTIVES

This Study was conducted to update the City's financial projections with a revenue sufficiency analysis (RSA) based on a full assessment of historical revenues and expenditure needs of the City. The RSA was conducted to establish a financial plan incorporating projections of operation and maintenance (O&M) costs, capital improvement program (CIP) project schedules, and the maintenance of minimum operating reserve balances. The RSA was then used to develop a full cost-of-service analysis based on test year revenue requirements to allocate costs of providing sewer service to each customer class, ensuring cost recovery adhered to principles of inter- and intra-class equity. Finally, this Study examined the existing rate structure and evaluated the potential implementation of an update to the customer classes and differentiation in rates. Updated rates were generated for a five-year period. This Study employed cost-of-service and rate design methodologies that are aligned with industry standard practices for rate setting as promulgated by the American Water Works Association (AWWA), Water Environment Federation (WEF) and applicable law, including commonly accepted industry guidelines designed to comply with California Constitution Article XIII D, Section 6(b), commonly referred to as Proposition 218.⁶

1.3 METHODOLOGY

The methodology followed during the Study was completed in in four phases, as follows:

Revenue Sufficiency Analysis – The RSA was completed using a multi-year financial forecasting model for the City's sewer system to determine the level of annual revenue required to satisfy the projected annual operating expenses, debt service, and capital cost requirements while maintaining adequate reserve levels. This portion of the Study was conducted using the revenue sufficiency and financial planning module of Stantec's proprietary Financial Analysis and Management System (FAMS) modeling system. The RSA includes a ten-year financial plan covering fiscal years (FY) 2024 through FY 2034. Although rates are suggested for no more than five years (mid-May FY 2025-FY 2030), it is useful and important for financial planning to consider the effects of rates over a longer period such as 10 years.

Cost-of-Service Analysis (COSA) – Using the revenue requirements from the RSA for FY 2024, a detailed COSA was completed based upon principles outlined by the WEF and other generally accepted industry practices to determine the proper distribution of costs and corresponding revenue requirements. The purpose of a COSA is to determine the cost of providing sewer services to various classes of customers based on the characteristics of the classes and their

⁶ Stantec Consulting Inc. is not a legal firm and does not provide legal advice to its clients.

demand on various components of sewers services provided. The costs of these components, including “flow” (collection and volume related treatment costs), and “strength” (treatment for Biochemical Oxygen Demand, Total Suspended Solids, and Nitrogen) are allocated based on estimated use of those components by customer class so that the revenue requirements of the utility may be equitably collected through rates. The Study employed methods promulgated in WEF’s Manual of Practice 27: Financing & Charges for Wastewater Systems (MOP 27) for the sewer system along with general guidance from AWWA’s Manual, Principles of Water Rates, Fees, and Charges, M1 (M1 Manual)⁷. The COSA includes the following steps:

The COSA included the following steps:

- ▶ Step 1: Credit non-rate revenue
- ▶ Step 2: Allocate costs to the appropriate activities/functions
- ▶ Step 3: Allocate the costs of each function to specific system parameters
- ▶ Step 4: Calculate unit costs
- ▶ Step 5: Distribute costs to customer classes based on unit costs and each class’ usage characteristics

Rate Structure Analysis – A rate structure analysis was carried out to evaluate the City’s current user rate structure. The Study developed specific rate schedules to recover the identified level of required rate revenue from the appropriate customers. The recommended rate schedules were designed to:

- ▶ Proportionately and equitably recover costs through rates;
- ▶ Conform to accepted industry practice and generally understood Proposition 218 and other legislative requirements;⁸
- ▶ Provide fiscal stability and recovery of fixed costs of the system; and
- ▶ Simplify administrative functions to the extent possible

1.4 REPORT ORGANIZATION

This Report is organized into four sections. Following this introduction, Section 2.0 discusses the Sewer Enterprise Fund RSA, Section 3.0 details the COSA phase of the Study, Section 4.0 presents the rate design process and resulting revised rate structure. A summary of the proposed rates is also provided at the end of Section 4.0.

⁷ Although the AWWA M1 is primarily focused on water rate setting, it is an accepted and well-known manual providing general cost of service and rate setting guidance for water and sewer utilities alike.

⁸ The understanding of legislative requirements is subject to change. Stantec Consulting Inc. is not a legal firm and does not provide legal advice to its clients. The City should retain legal counsel to review and provide legal advice regarding rates.

2.0 REVENUE SUFFICIENCY ANALYSIS

2.1 DESCRIPTION

This section of the Report presents the financial management plan and corresponding plan of sewer rate revenue adjustments developed in the revenue sufficiency analysis (RSA) phase of the Study. The following sub-sections present a description of the source data, assumptions, and results of the RSA. Appendix A provides detailed supporting schedules for the City's financial management plans.

Stantec obtained the City's historical and budgeted financial information pertaining to the operation of, and investment in, its sewer system. Historical customer flow data by customer class was derived from an analysis of billing data provided by the city for commercial accounts. Estimates of residential use flow are the same as estimates of flow per residential unit used in the City's 2024 Wastewater Master Plan. The residential flow data was modified for residential units in buildings with five or more units and for mobile homes based on an analysis of people per unit from American Community Survey US Census data and a recent flow monitoring study conducted for a nearby mobile home park. Total flow per day estimates per day were deemed reasonable when checked against total measured flow at the City's existing Wastewater Quality Control Facility.

City staff also provided a multi-year capital improvement program (CIP) plan. Stantec also discussed in detail other assumptions and policies with City staff that would affect the performance of the City, such as trends in demands, expected account growth, capital funding sources, earnings on invested funds, operating cost escalation rates, salary information for current staff, prudent adjustments to employee compensation, and targeted key performance indicators (KPI) such as target reserve levels and debt coverage ratios required for compliance with existing policies current and in anticipation of future bond funding.

The information was entered into the financial module of Stantec's proprietary Financial Analysis and Management System (FAMS) modeling system. This produced a ten-year projection of the sufficiency of current sewer rate revenues to meet current and projected financial requirements. The FAMS tool also aided in determining the level of rate revenue increases necessary in each year of the projection period to satisfy the system's annual financial requirements. It is prudent to conduct the financial projections for a ten-year period to give context for the longer-term effects of rate increases, even though rates are proposed for five years.⁹

The RSA phase of the Study included evaluation of several multi-year planning scenarios through interactive work sessions with City staff. This scenario analysis was focused on determining the level of rate revenue increases necessary to meet adjusted levels of capital spending, in addition to other sensitivity analyses. This process ensured that City staff input was incorporated into the development of

⁹ Stantec suggests that the RSA assumptions should be reviewed annually and that the cost-of-service based rates should be revisited at least every three to five years.

the recommended sewer utility financial management plan and the resulting sewer rate revenue adjustments presented in this report. The result of the RSA is a financial plan that uses the most current data to develop a multi-year projection meeting key financial performance objectives while minimizing rate adjustments to the extent possible.

2.2 SOURCE DATA

The following presents the key source data relied upon in conducting the RSA:

2.2.1 Beginning Fund Balances

The City staff provided the FY 2024 beginning fund balance for the Sewer Revenue Fund 640, the current Sewer Connection Fee Fund 650 and current restricted reserves.¹⁰ A summary of FY 2024 Beginning Balances is presented in Table 2-1.

Table 2-1: FY 2024 Sewer Enterprise Funds Beginning Balances

	Fund 640 Revenue Fund	Restricted Reserves	Fund 650 Connection Fee Fund
FY 24 Available Funds	\$32,345,690	\$3,289,537	\$25,241,860

The Fund 650 balance is scheduled to be mostly spent in FY 2025 for the construction of interim projects as part of the City’s Capital Improvement Program for sewer.

2.2.2 Revenues

The FY 2024 estimated actuals and the approved FY 2025 Budget served as the basis for Sewer Fund revenue projections. Current Sewer rate revenue consists of rate revenue charged based on rates per unit or measured flow by customer category for most accounts and a monthly calculation performed by Public Works staff of the wastewater flow for ten individual industrial accounts. Additional revenue is generated from annual payments from the City of Lathrop and other contractual customers, and for wastewater treatment services, interest income, and other miscellaneous incomes.

Projected rate revenue is based upon the FY 2024 estimated actual rate revenue and the forecasted customer accounts and billed volumes (see Section 2.3.4). The approved FY 2025 Budget was used to project other operating revenue. Interest income was calculated annually based upon projected average fund balances and conservatively estimated interest rates (see Section 2.3.3). Schedule 4 and Schedule 7 in Appendix A summarize projected revenues over the projection period.

¹⁰ At the City’s direction, the analysis assumes the projected revenue based on updated capacity charges that have been calculated but are pending adoption by the City Council. The term “Capacity Charge” will be replacing the term “Connection Fee” fee going forward.

2.2.3 Operating Expenses & Existing Debt

The City's operating expenses include all O&M expenses and non-CIP capital outlays. O&M expenses were based on the Sewer Revenue Fund's FY 2024 estimated actuals and approved FY 2025 Budgets. Figure 2-1 presents a summary of the projected O&M costs including the FY 2025 budget through FY 2030 that will be funded through user fees in Fund 640. These expenses were projected over the planning period based upon anticipated cost escalation factors which reflect general inflation, industry standard indices, and the City staff expectations. Escalation factors are discussed in greater detail in Section 2.3.1.

Figure 2-1: Operating & Maintenance Expenses (FY 25 – FY 30)

The sewer Utility currently has two outstanding debt issuances including the 2009 Series Revenue Bonds and the 2012 Series Revenue Bonds. The bond payments are currently funded through a split of 51.5% being funded through Fund 650 (Connection Fees) and 49.5% being funded through Fund 640 (Revenue Fund).¹¹

Figure 2-2 presents a summary of the annual bond payments for existing debt by fund through FY 2030.

¹¹ The split between connection fees and rates for bond payments predates this analysis. ¹² The City's cost allocation plan is currently being updated by a separate consultant and cost allocation transfers out may change accordingly when the update is complete. A future rate update will reflect the amounts determined by the updated cost allocation plan.

Figure 2-2: Existing Debt Payments (FY 25 – FY 30)

Schedule 5 and Schedule 7 in Appendix A summarize projected operating expenses over the projection period.

2.2.4 Transfers

The City's sewer utility currently receives an annual transfer in from the Solid Waste Departments annual use of Natural Gas from the CNG-Bio Gas Facility (constructed and operated by the City's sewer utility). FY 25 budgeted transfer totals \$380,000. These transfers in are projected to continue throughout the projection period and will increase with inflation. Schedule 5 and Schedule 7 in Appendix A present transfers over the projection period. The sewer utility also makes transfers out as part of a cost allocation plan for city provided services and these costs are included in the sewer budget in the sewer utility financial plan.¹²

2.2.5 Capital Improvement Program

The ten-year CIP for the City's sewer utility is based on the completed 20-year Master Plan.¹³ The timing of the CIP projects was updated to reflect a slower likely construction schedule for the purposes of the financial plan to recognize recent trends in project execution and to help manage (contain) the level of near-term rate impacts. In total, the City's CIP for its sewer from FY 2025 through FY 2030 is approximately \$223 million (in 2025 dollars). This equates to an average of \$37 million per year. Projects are funded through Funds 640 and 650 depending on if they are related to growth (Fund 650) or repair and replacement (Fund 640). The sewer utility CIP project costs and schedule are included in Schedule 3 of Appendix A.

¹² The City's cost allocation plan is currently being updated by a separate consultant and cost allocation transfers out may change accordingly when the update is complete. A future rate update will reflect the amounts determined by the updated cost allocation plan.

¹³ The CIP projects include sewer projects only. No stormwater projects are included in the Sewer CIP.

2.3 ASSUMPTIONS

The following presents the key assumptions utilized in the development of the financial plan which are provided on Schedule 1 of Appendix A.

2.3.1 Cost Escalation

Annual cost escalation factors for the various categories of O&M expenses were developed based upon discussions with the City staff, a review of historical trends, a detailed salary study of local cities and other agencies, and published projections of general inflation. Additionally, an annual cost escalation of 3.0% was applied to CIP costs for projects occurring during and after FY 2026. Capital cost escalation was based on recent construction cost escalation trends reported by the Engineering News Record (ENR) Construction Cost Index (CCI). Cost escalation factors are presented in Schedule 6 of Appendix A.

2.3.2 Operation and Maintenance Cost Execution

Historical budgeted and actual O&M expenditures were reviewed in detail with City staff during the development of the RSA. This review was intended to determine if cost projections were based on a representative level of actual spending and reflected typical O&M expenditure levels. During this review it became apparent that budgeted fixed O&M expenses consistently exceeded actual O&M expenses over previous years (FY 2021 – FY 2024). Because the FY 2025 budget serves as the basis for projected O&M expenses, projections have been adjusted down to 80% of budgeted levels for fixed cost operational items to reflect the observed historical trends in the previous percent of execution of operational items while basing the adjustment on the highest rate of actual to budget to remain conservative in the projection of expenses. Personnel service and variable operating costs are assumed to be executed at 100% of budget based on a similar analysis of historical trends.

2.3.3 Interest Earnings

The RSA reflects an assumed interest earnings rate of 2.00% on all Sewer Enterprise Fund balances throughout the projection period (FY 2025 - FY 2034). This level of interest earnings is representative of a conservative estimate of interest earnings based on historical interest income relative to the City's cash balances. Annual interest earnings are detailed in Schedule 4 and Schedule 7 of Appendix A.

2.3.4 Customer Growth & Volume Forecast

Projections of account growth and changes in billed volume are based upon discussions with City staff regarding the anticipated number of new service connections and recent trends in wastewater flows. The projections of growth are also consistent with those used in the recently adopted Wastewater Master Plan. The City is planning on consistent moderate growth every year in overall equivalent connections of about 2.8% per year. Based on a review of historical data and workshop discussions with City staff, per-account usage is projected to remain flat over the course of the Study projection period. Account growth and usage trends are further illustrated in Schedule 1 of Appendix A.

2.3.5 Reserve Target Recommendations

Reserve balances for a utility are funds set aside for a specific cash flow requirement, whether that's saving for a specific project or task, adherence to a legal covenant, ensuring the ability to fund emergency repairs to infrastructure, or maintaining the ability to cover O&M expenses under adverse circumstances. Furthermore, ratings agencies and the investment community place a significant emphasis on having sufficient reserves built into financial management policies. The level of reserves maintained by a utility is an important consideration in developing a multi-year financial management plan.

Operating reserves were a point of discussion during the development of the 10-year financial plan. The Sewer Revenue Fund 640 currently has a financial policy to maintain three months or 90 days of operating expenses in an operating reserve. This financial plan goes above and beyond the policy requirement stated above and assumes four months or 120 days of operating expenses in an operative reserve. The City is planning to update its reserve targets during the five year rate plan. The four month reserve target used in this Study is anticipated to be in line with the City's expected future reserve target for its sewer enterprise. Retaining 120 days of operating expenses as an operative reserve provides additional funding to accommodate the volatility of future capital spending.

The financial plan in this Study ensures reserves are maintained at or very near this reserve target throughout the projection period. Schedule 7 in Appendix A provides projected annual beginning and ending fund balances for the Sewer Revenue Fund.

2.3.6 Future Borrowing & Capital Funding

This Report proposes that the city cash finance all of their ongoing capital replacements, with exception of the WQCF Phase IV Stage 1 Expansion Project totaling \$151M (\$136.6 M to be bond funded) and a proposed \$33.5M bond funding in FY 26 that helps fund the North and South Plant aeration basin improvements, sidestream treatment system project (to remove nitrogen), UV disinfection system upgrade and adding another dissolved air flotation treatment (DAFT No. 3.) The assumed financing terms for the two debt issuances, were as follows:

- 30-year term
- 2.0 percent cost of issuance
- Fixed interest rate of 5.0 percent
- A 1-year debt service reserve requirement

2.4 RESULTS

Based upon the RSA and the data, assumptions, and policies provided by the City and presented herein, the City's current sewer rates will not provide sufficient revenue to meet its ongoing capital, operating, and reserve requirements over a multi-year projection period. This diagnostic analysis revealed that without rate adjustments the Sewer Revenue Fund 640 balance would fall below established reserve targets and all resources would be exhausted by FY 2027 under the current projection of operating and

CITY OF MANTECA: SEWER RATE AND FEE STUDY

Revenue Sufficiency Analysis

capital costs. After numerous discussions and at the direction of City staff, a financial management plan based on a corresponding set of sewer rate revenue increases that will meet the City's projected cost requirements under the projected conditions is presented and described in this report.

Several rate increase options were developed and discussed with the City. After consideration of the options presented, the City is choosing to move forward with the option that reflects a large initial increase of 37% as its preferred approach in the first year (mid-May of FY 2025 through FY 2026) to meet the City's planned capacity improvement and budgetary requirements. The magnitude of the increase is put into proper context by recognizing that the City has not increased its rates since 2010. The corresponding required revenue increases are presented in Table 2 2.

Table 2-2: Proposed Sewer Rate Revenue Increases, Mid-May FY 2025 – FY 2030

	May FY 2025-2026	FY 2027	FY 2028	FY 2029	FY 2030
Effective Date	5/15/2025	7/1/2026	7/1/2027	7/1/2028	7/1/2029
Sewer Rate Increase	37.0%	10.0%	6.0%	6.0%	6.0%

It is important to note that the projections of future conditions underlying this analysis are not intended to be predictions. Applicable to many wastewater utility systems, there are multiple factors beyond the City's control, such as i) weather, ii) regulatory changes, iii) national, regional, and local economic conditions, iv) the rate of growth in new customers, v) customer reaction to rate adjustments, vi) operating and capital cost inflation, and vii) changes in the timing and composition of the City's CIP, that will have material impacts on the future financial condition. These sources of uncertainty will yield differences between forecasted and actual results, some of which may be material. While Stantec bears no responsibility to update this report for unforeseen events and circumstances occurring after the date of this report, future management actions must be informed by, and adjusted to reflect, future outcomes as they occur. These comments are provided to emphasize the importance of active management informed by the reality of future operations of the sewer utility by the City.

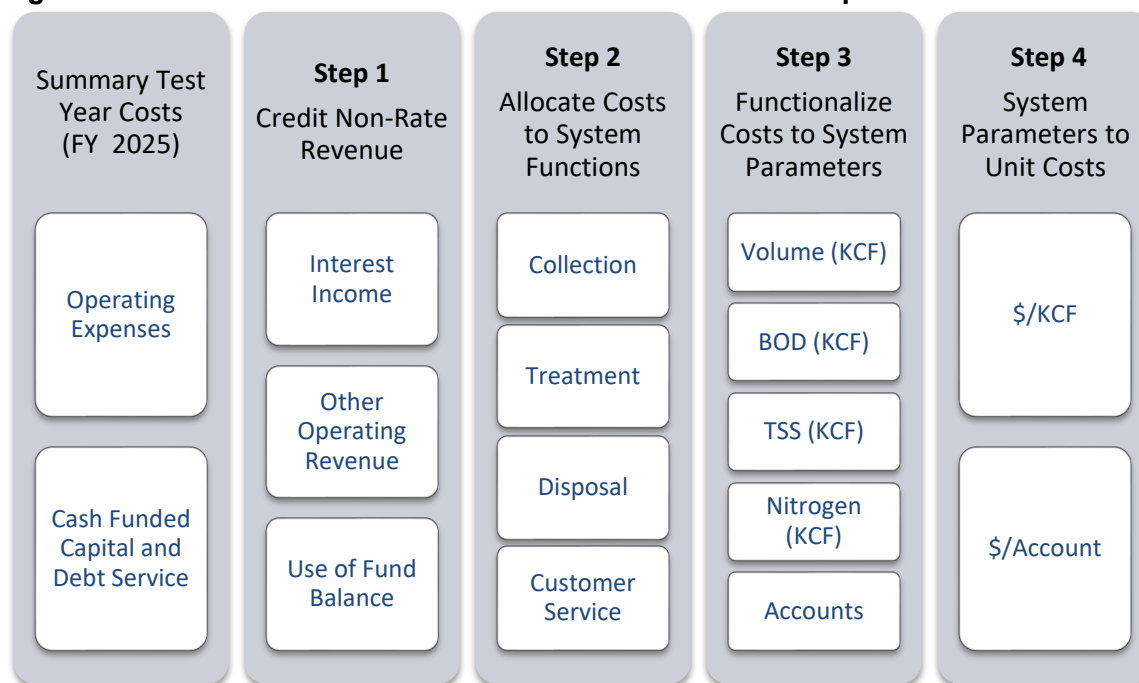

3.0 COST OF SERVICE ANALYSIS

The purpose of a Cost-of-Service Allocation (COSA) analysis is to determine the cost of providing sewer service to customer classes so that the proposed rate structure is aligned with those costs. This Study employed well-established industry practices for these types of studies as recognized by the AWWA, WEF, and other accepted industry practices. This section presents a detailed description of the COSA methodology and corresponding results.

The sewer cost allocation followed a functional approach in which the costs of each major treatment or management function were distributed using a combination of customer counts, billed volume, and sewer strength assumptions¹⁴. The sewer system costs were allocated to functions or activities, and those costs were distributed to the appropriate system parameters to calculate unit costs. The unit costs were then used to distribute system costs to customer classes based on account and strength characteristics to determine the cost to serve each customer class. These class-specific costs served as inputs for the rate design analysis.

The COSA was based upon the City's FY 2025 adopted budget expenditures and analyzed as illustrated in Figure 3-1.

Figure 3-1. Schematic of Cost-of-Service Cost Allocation Steps

¹⁴ Sewer strength assumptions were based on the City's 2008 Sewer Rate study, industry standards and were reviewed by with Stantec engineering staff who worked on the Manteca Wastewater Master Plan.

The following sub-sections give a detailed description of the COSA methodology and high-level results, while Appendix B includes detailed schedules of those results.

3.1.1 Customer Demand Characteristics

Cost-of-service allocation (COSA) is a process of allocating the system's rate revenue requirements to customers based on the demands they place on the system. Customer demands vary depending on the nature of the use at the location where service by the City is provided. For example, wastewater demand for residential customers is different than the wastewater demand for large industries, both in terms of the volume of billed flow and the quality or "strength" of the sewage produced, which requires different types and levels of sewer treatment. COSAs reflect the characteristics of different customer flows, with each individual customer paying its share of allocated costs of service for each unit of specific usage.

Usage and trends in both number of accounts as well as flows by customer class play an important role in the COSA. We are recommending that the City aggregate its customer classes into a simpler framework as depicted in Tables 3-1 and 3-2. (The basis for the change is described in Section 4.) The COSA uses the last full year of data (2024) for accounts and estimated flows, based on and derived from the 2023 billing data for estimating the flow volume for commercial accounts. Estimates of residential use flow per unit are the same as those used in the City's 2024 Wastewater Master Plan. The residential flow data was modified for residential units in buildings with five or more units and for mobile homes based on an analysis of people per unit from American Community Survey US Census data and a recent flow monitoring study conducted for a nearby mobile home park. Estimated flows using this method are consistent with daily flows experienced at the City's Wastewater Quality Control Facility. The estimated flow per customer class as shown in Table 3-1.

Table 3-1 Customer Volume and Counts in 2024

Customer Class	Estimated Volume (MG)	Number of Customers
Single-Family Residential	1,744	24,510
Multi-Family Residential	254	5,101
Mobile Home	22	487
Commercial – Low Strength	196	551
Commercial – Mid Strength	94	425
Commercial – High Strength	43	119
Total	2,353	31,193

The COSA uses assumed loading for different customer classes, shown in table 3-2, which have been reviewed with staff and are consistent with the most recent wastewater master plan as well as 2009 rate study.

Table 3-2 Assumed Customer Loading Characteristics

Customer Class	BOD (mg/L)	TSS (mg/L)	Nitrogen (mg/L)
Single-Family Residential	325	310	43
Multi-Family Residential	325	310	43
Mobile Home	325	310	43
Commercial – Low Strength	164	135	24
Commercial – Mid Strength	256	215	23
Commercial – High Strength	970	624	49

3.1.2 Credit Non-Rate Revenue

The COSA analysis started with the adopted 2025 budget which consisted of operations and maintenance, capital, and cash funded capital cost components. The operations budget was then pared down to account for projected execution based on historical trends identified in the revenue sufficiency analysis. Additionally, the use of reserves and non-rate revenues (mainly revenues from contractual sewer customers) were deducted from the expected expenditures in order to arrive at the net rate revenue requirement which will be utilized for the remainder of the cost-of-service study and is the amount of resources that sewer rates must ultimately generate.

Table 3-3 FY 2025 Net Rate Revenue Requirement Identification

Process	FY 2025 Costs
FY 2025 Operations and Maintenance (executed)	\$19,042,344
FY 2025 Debt Service (rate funded portion only)	\$1,294,705
FY 2025 Cash Funded Capital	\$4,306,265
Use of Reserves	\$(5,306,680)
Non-Rate Revenues	\$(2,910,044)
Net Rate Requirement ^{/1/}	\$16,426,588
/1/ Total may not sum exactly due to rounding.	

3.1.3 Allocate Net Revenue Requirement to Functions

Each cost from the FY 2025 adopted budgeted expenditures was allocated to the primary system functions for the City's wastewater system including Collection, Treatment, Disposal and Customer Service. Costs are allocated to system functions on budget line-item basis. Where possible, costs were assigned in whole to a single function. For example, all costs in the Collection Systems Maintenance division were allocated to the collection function. At times, the delineation of budget line items cannot be determined in whole to a single function; therefore, the system costs were allocated indirectly based on

CITY OF MANTECA: SEWER RATE AND FEE STUDY

Cost of Service Analysis

the directly allocated line items. Similar to O&M, capital costs and debt service are allocated to the same set of system functions. After reviewing the capital projects for 2025 all cash funded capital was allocated to the treatment function as wastewater treatment plant expansions/improvements costs made up the main identifiable project cost.

Table 3-4 provides a summary of the net rate requirement allocation of system costs to functions for the wastewater system for FY 2025. (A detailed breakdown of the allocation of system costs is shown in Appendix B).

Table 3-4 FY 2025 Wastewater Functional Cost Allocation Summary

Process	FY 2025 Costs
Collection	\$2,946,164
Treatment	\$11,246,268
Disposal	\$1,630,631
Customer Service	\$603,526
Total ^{/1/}	\$16,426,588
/1/ Total may not sum exactly due to rounding.	

3.1.4 Allocate Net Revenue Requirement to Parameters

Allocating the net rate revenue requirement for FY 2025 to parameters allows for the analysis to distribute costs to the units of service that underly customer classes, such as flow, strength/loadings, and bills or EDUs. In order to distribute costs based on billable units, each functional cost category must be further broken down into flow components, strength/loading components in terms of biochemical oxygen demand (BOD), total suspended solids (TSS), and Nitrogen (N), and customer service components. Table 3-5 below displays the percentage allocation of functional costs across flow, BOD, TSS, Nitrogen and customers, based on data provided by City of Manteca Public Works staff and Stantec engineers who worked on the Wastewater Master Plan regarding functionalized Net Plant Asset values. Treatment costs were allocated across flow, BOD, TSS and Nitrogen, while Disposal costs were allocated to BOD, TSS and Nitrogen, based on data provided by City of Manteca Public Works staff and Stantec engineers who worked on the Wastewater Master Plan regarding functionalized Net Plant Asset values.

Table 3-5 Allocation Parameters of Functions to System Parameters

	Volume	BOD	TSS	Nitrogen	Customer
Collection	100%				
Treatment	33.0%	21.7%	29.7%	15.6%	
Disposal		49.6%	49.9%	0.5%	
Customer Service					100%

CITY OF MANTECA: SEWER RATE AND FEE STUDY

Cost of Service Analysis

Table 3-6 displays the resulting net revenue requirement distribution from the allocation.

Table 3-6 Allocation of Functional Revenue Requirements to System Parameters

	Volume	BOD	TSS	Nitrogen	Customer	Total
Collection	\$2,946,164	\$0	\$0	\$0	\$0	\$2,946,164
Treatment	\$3,704,972	\$2,441,094	\$3,344,144	\$1,756,057	\$0	\$11,246,267
Disposal	\$0	\$809,357	\$812,950	\$8,324	\$0	\$1,630,631
Customer Service	\$0	\$0	\$0	\$0	\$603,526	\$603,526
Total	\$6,651,136	\$3,250,451	\$4,157,094	\$1,764,381	\$603,526	\$16,426,588

3.1.5 Cost of Service Allocation Results

The resulting COSA outcome based on FY 2025 cost allocations and FY 2024 customer units of service are presented in Figure 3-2 below. The COSA identifies the proper proportional allocation of net revenue requirement to each customer class. These findings will be utilized in Section 4 to determine the proper level of sewer rates for each customer class.

Figure 3-2. FY 25 Wastewater Revenue Requirements by Customer Class

4.0 PROPOSED RATE STRUCTURE AND RATE SCHEDULE

Upon completion of the COSA, a rate structure analysis was performed to identify potential rate structure modifications and establish sewer rates for implementation in late FY 2025 (5/15/2025) that will:

- ▶ Proportionately recover revenue requirements through rates;
- ▶ Conform to accepted industry practice and generally understood legal requirements;
- ▶ Provide fiscal stability and recover the annual of costs of the system.

The following sub-sections present the current rates, a description of the basis of the recommended rate structure modifications and the specific rates for implementation in FY 2025 (to be implemented on May 15th, 2025) and FY 2026. The full recommended rate schedules for FY 2026 (May 2025) through FY 2030 are provided in Section 4.4.

4.1 CURRENT RATES AND RATE STRUCTURE REVIEW

Current sewer rates consist of a fixed monthly fee for residential and equivalent accounts, as well as commodity (use based) rates to 17 different customer classes, charged based on metered water usage. The City's current sewer rates are presented in Table 4-1, below.

Table 4-1: Current Sewer Rates for FY 2025

Customer Class	Jan. 1, 2010 and Thereafter	Basis on Which Rates Charged
Residential and equivalents	\$43.30	per unit
Trailer Park	\$36.57	per 1,000 CF
Rooming houses	\$27.70	per 1,000 CF
Commercial/retail	\$30.96	per 1,000 CF
Hotel/motel	\$33.81	per 1,000 CF
Hotel/motel w/kitchen	\$61.89	per 1,000 CF
Car washes/ laundromats	\$24.53	per 1,000 CF
Service stations (metered)	\$34.04	per 1,000 CF
Office/light industrial	\$25.35	per 1,000 CF
Restaurants	\$72.42	per 1,000 CF
Markets	\$75.45	per 1,000 CF
Mortuaries	\$75.45	per 1,000 CF
Hospitals	\$32.69	per 1,000 CF
Elementary schools	\$24.06	per 1,000 CF
Secondary schools	\$28.71	per 1,000 CF
Churches	\$28.71	per 1,000 CF
Nonprofit	\$27.82	per 1,000 CF
Commercial mixed use	\$40.23	per 1,000 CF

CITY OF MANTECA: SEWER RATE AND FEE STUDY

Proposed Rate Structure and Rate Schedule

Industrial Category	Jan. 1, 2010 and Thereafter	Basis on Which Rates Charged
Flow/Volume	\$2,023.24	per MG
BOD	\$0.404	per lb
TSS	\$0.765	per lb
Nitrogen	\$2.866	per lb

4.2 RECOMMENDED SEWER RATE MODIFICATIONS

Setting rate structures requires the balancing among competing objectives to meet the highest level objectives of the sewer system such as generating sufficient revenues, proportionally distributing sewer revenue requirements based on volume & loadings, providing administrative simplicity, and meeting legal requirements.

The most fundamental objective is generally considered to be that rates must generate a sufficient level of revenue to fund the ongoing operations and capital investments needs of the sewer system. The revenue sufficiency analysis conducted in Section 2 of this report identified that current revenues are not sufficient over the five-year rate setting period. As such it is recommended that the revenue generation of the system in FY 2025 and FY 2026 (starting in May 2025) be increased by 37% over the current revenue generations levels. All rate calculations presented in this section have this increased revenue need built in.

Additionally, the results of the COSA inform rate structure refinement by distributing the revenue requirements of the sewer system to customer classes based on unique usage characteristics. At the conclusion of the cost-of-service analysis, presented in Section 3, each customer class was assigned a revenue requirement as presented in 3.1.6. It is the recommendation of this study that those customer class revenue targets be utilized as the basis for sewer rate making for each customer class so that sewer rates will reflect a proportional distribution of sewer revenue requirements to each customer class. As such, the customer class revenue requirement targets presented in section 3.1.6, once escalated by 37% to account for the revenue sufficiency needs of the system, were utilized as the basis for the sewer rate presented herein.

The City currently has as 18 unique customer classes, each with their own sewer rate. While this level of detail in sewer rate classes was common and continues to be used in many places, it results in more complexity in administration and requires more management and administration time than simpler alternatives. This additional complexity could be warranted if the more detailed class structure achieved higher levels of accuracy in cost recovery, but most utilities do not have sufficiently detailed class sampling procedures or frequent enough sampling events to create a locally relevant database of sufficient quality. More simply, the current mix of customers classes could be viewed as a reflecting distinction without any meaningful difference. For instance, restaurants, mortuaries, and markets are assumed to have the same expected loading characteristics given the level of accuracy provided by current day sewer sampling and measurement technologies as well as studies. This is reflected in

CITY OF MANTECA: SEWER RATE AND FEE STUDY

Proposed Rate Structure and Rate Schedule

similarity of their current rates \$72.42, \$75.45, and \$75.45, respectively established in the 2008 rate study and confirmed in the cost-of-service analysis completed in this Section 3. Modern sewer rate making practices would recommend the lessening of the number of customer class when such uniformity is present and keeping distinction when customers do indeed use the service in a materially different way. Doing so will simplify the administration of sewer rates, while preserving proportionality by creating distinct rate classes when required. As such, it is recommended that the City's sewer customer rate classes are reduced from 18 separate classes to the seven customer rate classes shown below:

- Single-Family Residential – Single family units
- Multi-Family Residential – two or more units
- Mobile Homes – Manufactured housing in mobile home parks; trailers
- Commercial – Low Strength (BOD under 200 ppm and TSS under 300 ppm; Nitrogen 15-43 MG/l)
- Commercial – Mid Strength (BOD over 200 ppm but under 600 ppm; TSS under 300 ppm; Nitrogen 20-43 MG/l)
- Commercial – High Strength (BOD 600 ppm or higher; TSS 300 ppm or above; Nitrogen 43-50 MG/l)
- Industrial – strengths vary, billing continues to reflect sampling results.

In addition to the standard customers and rates for sewer services the City also has a handful of industrial category customers. These customers are notable in that they discharge sewer at strengths considered atypical, typically higher than standard customers. Accordingly, the Public Works department manages and defines these customers on a case-by case basis in a manner to minimize their impacts on the system and ensure that they are billed correctly for the service rendered. Given the dynamic nature of sewer contributions from these customers they are billed for their unique waste load characteristics (Volume, TSS, BOD, Nitrogen) separately on each bill. This study recommends keeping this practice in place and updating these constitute rates based on the cost-of-service analysis and revenue requirements to ensure they reflect the current requirements of the system.

In summary this study recommends the following rate structure modifications:

- 1) Setting rates on 5/1/5/2025 that reflect a 37% increase in revenue over current rates
- 2) Setting each customer classes rates to generate the unique requirements found in the cost-of-service analysis (increased by 37%), based on their proportional system usage
- 3) Simplifying sewer rate classes from the current 18 categories to seven

4.3 RECOMMENDED SEWER RATES

This Study aims to update current rates based on the latest available data and while reflecting the cost to provide service and the updated revenue requirement needs of the system. Based on a review of the

CITY OF MANTECA: SEWER RATE AND FEE STUDY

Proposed Rate Structure and Rate Schedule

current rate structure, a key study driver was to adhere to cost-driven rate design principles using COS results, while complying with generally accepted applicable legal requirements, such as Proposition 218. It is also recommended that the City consolidate customer classes for ease of administering the City's sewer rate program.

Rates for FY 2025 and FY 2026 (effective 5/15/2025) were developed based on the updated COSA, the latest customer and usage data, and addressing the structural changes listed above. Tables 4-2 shows the proposed rates for FY 2025 and FY 2026 (effective 5/15/2025).

The RSA and COSA analyses were conducted using the latest available data at the time of the analysis. The RSA and the COSA analysis should be revisited and updated at a minimum five years. The underlying assumptions should be reviewed annually by the City and the analyses should be updated sooner if the City deems there to be significant changes in the sewer budget, funding sources, CIP costs, land use and projections of new development, or other assumptions described in this Study.

Table 4-2: Proposed Sewer Rates for FY 2025 (May 2025) and FY 2026

Customer Class	Effective Date of May 15, 2025 FY 2025-2026	Basis on Which Rates Charged
Single-Family Residential	\$58.60	per unit
Multi-Family Residential	\$41.70	per unit
Mobile Home	\$37.20	per unit
Commercial – Low Strength	\$45.70	per 1,000 CF
Commercial – Mid Strength	\$55.40	per 1,000 CF
Commercial – High Strength	\$104.60	per 1,000 CF
Industrial Class	Effective Date of May 15, 2025 FY 2025-2026	Basis on Which Rates Charged
Volume	\$3,872.20	per MG
BOD	\$0.70	per lb
TSS	\$1.00	per lb
Nitrogen	\$3.10	per lb

4.4 EXPECTED SINGLE FAMILY RESIDENTIAL CUSTOMER IMPACTS

Given the nature of this study's recommendations it is expected that there will be customer bill impacts when comparing what customers are currently charged in FY 2025 to the recommended effective rates for the remainder of FY 2025 and FY 2026 (5/15/2025). These impacts will vary by the type of customer, units served, and usage characteristics. This section is intended to highlight the most common impacts that single family residential customers with one unit will experience upon implementation, for sewer service.

CITY OF MANTECA: SEWER RATE AND FEE STUDY

Proposed Rate Structure and Rate Schedule

Table 4-3: Expected Residential Customer Impacts

	Current Bill FY 2025	Proposed Bill FY 2026	Change \$	Change %
Single-Family Residential (1 Unit)	\$43.30	\$58.60	\$15.30	35.33%

Table 4-4 provides a combination of the revenue sufficiency analysis and it's projected rate revenue increases with the updated sewer rate structure to provide a forecast of expected sewer rates over the next five fiscal years.

Table 4-4: Projected Sewer Rate Increase

		FY 25-2026	FY 2027	FY 2028	FY 2029	FY 2030
Effective Date	Basis	May 15, 2025	July 1, 2026	July 1, 2027	July 1, 2028	July 1, 2029
Rate Increase		37.0%	10.0%	6.0%	6.0%	6.0%
Single-Family Residential	per unit	\$58.60	\$64.50	\$68.40	\$72.50	\$76.90
Multi-Family Residential	per unit	\$41.70	\$45.90	\$48.70	\$51.60	\$54.70
Mobile Home	per unit	\$37.20	\$40.90	\$43.40	\$46.00	\$48.80
Commercial - Low Strength	per 1,000 CF	\$45.70	\$50.30	\$53.30	\$56.50	\$59.90
Commercial - Mid Strength	per 1,000 CF	\$55.40	\$60.90	\$64.60	\$68.50	\$72.60
Commercial - High Strength	per 1,000 CF	\$104.60	\$115.10	\$122.00	\$129.30	\$137.10
Volume	per MG	\$3,872.20	\$4,259.40	\$4,515.00	\$4,785.90	\$5,073.10
BOD	per lb	\$0.70	\$0.80	\$0.80	\$0.80	\$0.80
TSS	per lb	\$1.00	\$1.10	\$1.17	\$1.24	\$1.31
Nitrogen	per lb	\$3.10	\$3.41	\$3.61	\$3.83	\$4.06

CITY OF MANTECA: SEWER RATE AND FEE STUDY

Proposed Rate Structure and Rate Schedule

DISCLAIMER

This document was produced by Stantec Consulting Services Inc. ("Stantec") for the City of Manteca ("City") and is based on a specific scope agreed upon by both parties. In preparing this report, Stantec utilized information and data obtained from the City or public and/or industry sources. Stantec has relied on the information and data without independent verification, except only to the extent such verification is expressly described in this document. Any projections of future conditions presented in the document are not intended as predictions, as there may be differences between forecasted and actual results, and those differences may be material.

Additionally, the purpose of this document is to summarize Stantec's analysis and findings related to this project, and it is not intended to address all aspects that may surround the subject area. Therefore, this document may have limitations, assumptions, or reliance on data that are not readily apparent on the face of it. Moreover, the reader should understand that Stantec was called on to provide judgments on a variety of critical factors which are incapable of precise measurement. As such, the use of this document and its findings by the City should only occur after consultation with Stantec, and any use of this document and findings by any other person is done so entirely at their own risk.

Appendix A REVENUE SUFFICIENCY ANALYSIS DETAILS

Schedule 1 – Assumptions

Schedule 2 – Beginning Balances as of July 1, 2024

Schedule 3 – Capital Improvement Program

Schedule 4 – Projection of Cash Inflows

Schedule 5 – Projection of Cash Outflows

Schedule 6 – Operating Cost Escalation Factors

Schedule 7 – Cash Flow Pro Forma

Schedule 8 – FAMS Control Panel – Proposed Financial Plan

Schedule 9 – Cash Project Funding Summary

Schedule 10 – Funding Summary by Fund

Schedule 11 – Senior Lien Borrowing Projections

Schedule 12 – Other Borrowing Projections

Appendix B COST OF SERVICE ANALYSIS DETAILS

Schedule 1 – Cost Allocation Framework: Mapping of Functions and Cost

Schedule 2 – Sewer System Test Year Expenses

Schedule 3 – Cost Allocation Factors

Schedule 4 - Sewer System Operating & Debt Service Expense Allocation to Functions

Schedule 5 – Summary of Sewer Test Year Units of Service

Schedule 6 – Sewer Functional Cost Allocations

Schedule 7 – Sewer Cost Allocation Functions & Flow Data

Schedule 8 – Summary of Sewer Revenue Requirement Allocations

Schedule 9 – Customer Class Mapping

City of Manteca Salary Comparison Study

The conclusions in the Report titled City of Manteca Salary Comparison Study are Stantec's professional opinion, as of the time of the Report, and concerning the scope described in the Report. The opinions in the document are based on conditions and information existing at the time the scope of work was conducted and do not take into account any subsequent changes. The Report relates solely to the specific project for which Stantec was retained and the stated purpose for which the Report was prepared. The Report is not to be used or relied on for any variation or extension of the project, or for any other project or purpose, and any unauthorized use or reliance is at the recipient's own risk.

Stantec has assumed all information received from City of Manteca (the "Client") and third parties in the preparation of the Report to be correct. While Stantec has exercised a customary level of judgment or due diligence in the use of such information, Stantec assumes no responsibility for the consequences of any error or omission contained therein.

This Report is intended solely for use by the Client in accordance with Stantec's contract with the Client. While the Report may be provided by the Client to applicable authorities having jurisdiction and to other third parties in connection with the project, Stantec disclaims any legal duty based upon warranty, reliance or any other theory to any third party, and will not be liable to such third party for any damages or losses of any kind that may result.

List of Appendices

Appendix A Salary Schedules

1 Introduction & Methodology

The City of Manteca (City) desires to review the City's salary ranges for City staff positions in comparison to neighboring cities. The City requested the following staff positions be evaluated in this study:

1. Director of Engineering
2. Deputy Director of Engineering
3. Management Analyst
4. Engineering Manager (new/future)
5. Senior Engineer
6. Associate Engineer
7. Senior Engineering Technician
8. Public Works Director
9. Deputy Director - Water Resources
10. Administrative Assistant III
11. Supervisory Control and Data Acquisition (SCADA) Engineer
12. Water Resources Project Manager (new/future)
13. Water Resources Regulations Manager
14. Senior Environmental Compliance Inspector
15. Environmental Compliance Inspector
16. Laboratory Supervisor
17. Lead Laboratory Technician
18. Laboratory Technician II
19. Laboratory Technician I
20. Water Resources Coordinator
21. Wastewater Operations Manager
22. Wastewater Maintenance Supervisor
23. Lead Wastewater Plant Maintenance Technician
24. Senior Instrumentation Technician
25. Instrument Technician/Electrician
26. Utilities Mechanic
27. Wastewater Plant Maintenance Worker I
28. Wastewater Collections System Supervisor

City of Manteca Salary Comparison Study

1 Introduction & Methodology

29. Lead Wastewater Collections Worker
30. Wastewater Maintenance Worker III
31. Wastewater Maintenance Worker II
32. Wastewater Maintenance Worker I
33. Wastewater Operations Supervisor
34. Lead Wastewater Treatment Operator (new/future)
35. Wastewater Treatment Operator III
36. Wastewater Treatment Operator II
37. Wastewater Treatment Operator I
38. Maintenance Planner

Stantec researched neighboring cities to determine the staff positions with responsibilities/duties most comparable to the City of Manteca's job descriptions for the identified positions above. The data sources used in this study included city websites, class specifications, and salary schedules. The cities reviewed in this study, as approved by the City of Manteca, are listed below along with the date(s) that the salary schedule used in this study was last updated/adopted/effective for the respective city. All salary schedules used in this study are included in **Appendix A**.

1. City of Manteca: management salary schedule updated 1/16/2024, mid-management salary schedule updated 11/7/2023, general services salary schedule updated 12/1/2023, and technical services salary schedule effective 10/17/2023.
2. City of Benicia (Benicia): salary schedule updated 11/8/2023.
3. City of Brentwood (Brentwood): salary schedule effective 7/1/2023 (Council approved 7/25/2023).
4. City of Davis (Davis): salary schedule adopted by City Council 9/5/2023.
5. City of Livermore (Livermore): salary schedule amended 12/11/2023.
6. City of Lodi (Lodi): salary schedule adopted by City Council 2/7/2024.
7. City of Stockton (Stockton): salary schedule revised 2/7/2024.
8. City of Vacaville (Vacaville): salary schedule updated/effective 2/12/2024.

Once the staff positions most comparable to the City of Manteca's positions were identified, the staff positions minimum and maximum monthly salaries for all cities were compared.

Some items to note regarding the methodology and assumptions made include:

1. For the cities with multiple applicable positions, the minimum monthly salary for the lowest level is shown as the minimum monthly salary and the maximum monthly salary for the highest level is shown as the maximum monthly salary. The positions are listed from lowest to highest monthly salary (i.e., the minimum monthly salary is obtained from the minimum monthly salary of the first position in the list and the maximum monthly salary is obtained from the maximum monthly salary of the last position in the list).

2. When salary ranges or job titles differed between a city's class specifications and the salary schedule, the salary schedule was assumed to be more accurate.
3. When salary ranges were given as an annual rate, it was assumed that the annual pay was equally distributed over 12 months.
4. Neighboring city staff positions were chosen to be the most comparable in responsibilities/duties to the City of Manteca's staff positions. However, responsibilities/duties may vary depending on the size of the city and the salary range may represent a city of a larger or smaller size. Additionally, some job descriptions of neighboring cities include responsibilities/duties that are not included in the City of Manteca's job descriptions. Similarly, some job descriptions of neighboring cities do not include all responsibilities/duties that are included in the City of Manteca's job descriptions.

2 Results

Table 1 through **Table 37** summarize the information gathered during this study. **Figure 1** through **Figure 37** show the monthly salary range for each city and the median for the respective staff position. The number of the table and figure matches the number in the position list above for the respective position. The only position not included in the tables and figures below is the Maintenance Planner position as there were no positions found that were considered to be equivalent to the City of Manteca's Maintenance Planner position. While there were similar positions that had responsibilities related to planning maintenance activities, the positions at the other cities were materially different from the City of Manteca's position in that the other positions also included actually completing the maintenance work, supervising the maintenance work, and/or reviewing the maintenance work after it's completed.

City of Manteca Salary Comparison Study

1. This position is cross listed as the Lead Wastewater Plant Maintenance Technician.
2. This position is cross listed as the Utilities Mechanic.
3. This position is cross listed as the Instrument Technician / Electrician.
4. Lodi only listed a maximum salary for this position. \$400 was subtracted from the minimum monthly salary so it would be visible on the graph.

Figure 37: Wastewater Treatment Operator I and Comparable Staff Positions Monthly Salary Range and Median

City of Manteca Salary Comparison Study

2 Results

An analysis was performed using the average and median minimum/maximum monthly salary values for the neighboring cities for each respective position. The analysis included calculating the percent difference in salary for each respective position (comparing the City of Manteca's salary to the average or median salary of the neighboring cities), as shown in **Table 39** and **Table 40**, respectively. Additionally, the average and median minimum/maximum monthly salaries for all positions were averaged to yield an overall "percent difference of averages", as shown in **Table 38**. It appears that while the City of Manteca's salary ranges are comparable to some of the cities, in general, the City of Manteca's minimum and maximum monthly salaries are lower than the average and median minimum/maximum monthly salaries of the neighboring cities studied (with some exceptions for certain positions and/or cities).

Table 38. Percent Difference of Averages Using Neighboring City Averages and Medians

	Percent Difference of Averages	
	Minimum Monthly Salary	Maximum Monthly Salary
Using Neighboring City Averages ⁽¹⁾	6.8%	8.8%
Using Neighboring City Medians ⁽²⁾	8.1%	10.3%

1. "Percent Difference of Averages" is calculated as (the average of all Neighboring City Average Monthly Salaries - the average of all City of Manteca Monthly Salaries) / the average of all City of Manteca Monthly Salaries. See **Table 39**.
2. "Percent Difference of Averages" is calculated as (the average of all Neighboring City Median Monthly Salaries - the average of all City of Manteca Monthly Salaries) / the average of all City of Manteca Monthly Salaries. See **Table 40**.

- Four positions were excluded from this analysis. There were no positions found that were considered to be equivalent to the City of Manteca's Maintenance Planner position and Maintenance Planner is therefore excluded from this analysis. Engineering Manager, Water Resources Project Manager, and Lead Wastewater Treatment Operator are future/new positions, so these three positions do not yet have a salary range to compare against the other cities and are therefore excluded from this analysis.
- City of Manteca salary excluded from neighboring city average minimum and maximum monthly salaries.
- "Position Percent Difference" is calculated for each individual position as (Neighboring City Average Monthly Salary - City of Manteca Monthly Salary) / City of Manteca Monthly Salary.
- "Percent Difference of Averages" is calculated as (the average of all Neighboring City Average Monthly Salaries - the average of all City of Manteca Monthly Salaries) / the average of all City of Manteca Monthly Salaries.

Percent Difference of Averages ⁽⁴⁾	8.1%		-	10.3%		-

- Four positions were excluded from this analysis. There were no positions found that were considered to be equivalent to the City of Manteca's Maintenance Planner position and Maintenance Planner is therefore excluded from this analysis. Engineering Manager, Water Resources Project Manager, and Lead Wastewater Treatment Operator are future/new positions, so these three positions do not yet have a salary range to compare against the other cities and are therefore excluded from this analysis.
- City of Manteca salary excluded from neighboring city median minimum and maximum monthly salaries.
- "Position Percent Difference" is calculated for each individual position as (Neighboring City Median Monthly Salary - City of Manteca Monthly Salary) / City of Manteca Monthly Salary.
- "Percent Difference of Averages" is calculated as (the average of all Neighboring City Median Monthly Salaries - the average of all City of Manteca Monthly Salaries) / the average of all City of Manteca Monthly Salaries.

RESOLUTION NO. 23-123, SERIES 2023

**RESOLUTION OF THE CITY COUNCIL OF THE CITY OF DAVIS
APPROVING CITYWIDE SALARY TABLE**

WHEREAS, the California Public Employees' Retirement System (CalPERS) code requires the City to have and maintain a publicly adopted and posted Salary Table; and

WHEREAS, CalPERS requires the salary table to be updated to reflect changes that occur over time; and

WHEREAS, the City of Davis is meeting the requirement of CCR Section 570.5 by adopting the Citywide Salary Table; and

WHEREAS, the salary table includes the changes to reflect completed employee group negotiations and approved MOUs and the resultant market adjustments to salary ranges, as well we updated titles to positions as a result of the citywide classification study.

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Davis does hereby approve and adopt the September 5, 2023 Citywide Salary Table, attached hereto as Exhibit A.

PASSED AND ADOPTED by the City Council of the City of Davis on this 5th day of September, 2023, by the following vote:

AYES: Chapman, Neville, Partida, Vaitla, Arnold

NOES: None

Will Arnold
Mayor

ATTEST:

Zoe S. Mirabile, CMC
City Clerk

City of Davis

IN THE CITY COUNCIL OF THE CITY OF LIVERMORE, CALIFORNIA

A RESOLUTION AMENDING THE CITY OF LIVERMORE SALARY PLAN DATED JANUARY 2024, IN ACCORDANCE WITH CALIFORNIA CODE OF REGULATIONS, TITLE 2, SECTION 570.5, AND ADDING 1.0 FTE TO THE BUDGETED PERSONNEL ALLOCATIONS

The proposed City of Livermore Salary Plan, attached hereto as Exhibit A, is intended to make the following amendments:

- Incorporate minimum wage increases and an expanded salary range of \$16.00 - \$26.00 per hour for the classifications of Department Assistant (Class Code 210), Field/Maintenance Aide (Class Code 438), Law Clerk (Class Code 240), and Police Cadet (Class Code 961);
- Incorporate minimum wage increases and create a salary range of \$16.00 - \$20.00 per hour for the classification of Library Aide (Class Code 920);
- Incorporate adjustments to the salary ranges for the following classifications:
 - Temporary Librarian (Class Code 915) - \$22.00 - \$32.00 per hour
 - Temporary Library Assistant (Class Code 916) - \$20.00 - \$30.00 per hour
 - Temporary Library Clerk (Class Code 917) - \$18.00 - \$28.00 per hour
- Delete the Reserve Police Officer (Class Code 963) classification.

The Maintenance Division of the Public Works Department recently completed a review of the Landscape Maintenance Districts (LMDs) funding and determined budget funds are available to add a full-time Public Works Supervisor position. The new Public Works Supervisor will oversee all LMD activities to ensure each LMD is receiving optimal level of services, including sidewalk and sound wall repairs.

- Add 1.0 FTE Public Works Supervisor to the Public Works Department, Maintenance Services Division Budgeted Personnel Allocations.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Livermore that, in accordance with California Code of Regulations, Title 2, Section 570.5, it hereby approves the amended Salary Plan dated January 2024, attached hereto as Exhibit A, to modify the Unclassified and Hourly Salary Schedule, effective January 1, 2024, and to delete the Reserve Police Officer (Class Code 963) classification.

BE IT FURTHER RESOLVED by the City Council of the City of Livermore that an additional 1.0 FTE Public Works Supervisor is hereby added to the Public Works Department Maintenance Services Division to Budgeted Personnel Allocations.

On motion of Council Member Carling, seconded by Vice Mayor Kiick, the foregoing resolution was passed and adopted on December 11, 2023, by the following vote:

AYES: Council Members Branning, Carling, Vice Mayor Kiick and Mayor Marchand
NOES: None
ABSENT: Council Member Barrientos
ABSTAIN: None

RESOLUTION NO. 2024-11

A RESOLUTION OF THE LODI CITY COUNCIL APPROVING THE CITY OF LODI PAY SCHEDULE EFFECTIVE FEBRUARY 7, 2024, PURSUANT TO PUBLIC EMPLOYEES' RETIREMENT LAW, GOVERNMENT CODE SECTIONS 20636 AND 20636.1 AND CALIFORNIA CODE OF REGULATIONS SECTION 570.5

=====

WHEREAS, the City of Lodi contracts with California Public Employees' Retirement System (CalPERS) to provide retirement benefits for its employees who are members; and

WHEREAS, all employers must comply with compensation earnable provisions and corresponding regulations of the Public Employees' Retirement Law (PERL) and California Code of Regulations, Section 570.5; and

WHEREAS, the regulations require employers to review their pay schedules and to verify that all members' pay amounts are accurately reported and approved by the governing body in accordance with requirements of applicable public meeting laws; and

WHEREAS, the Human Resources Manager verifies that the attached pay schedule, dated February 7, 2024, conforms with the requirements under the PERL and the California Code of Regulations.

NOW, THEREFORE, BE IT RESOLVED that the Lodi City Council does hereby approve the City of Lodi pay schedule dated February 7, 2024, attached hereto and made a part of this Resolution.

Dated: February 7, 2024

=====

I hereby certify that Resolution No. 2024-11 was passed and adopted by the City Council of the City of Lodi in a regular meeting held February 7, 2024, by the following vote:

AYES: COUNCIL MEMBERS – Bregman, Hothi, Nakanishi, Yepez, and Mayor Craig

NOES: COUNCIL MEMBERS – None

ABSENT: COUNCIL MEMBERS – None

ABSTAIN: COUNCIL MEMBERS – None

OLIVIA NASHED
City Clerk

40--EP	-	Unrepresented - Executive Personnel (City Attorney)
41--PP	-	Unrepresented - Professional Personnel (City Attorney)
42--SP	-	Unrepresented - Support Personnel (City Attorney)
70--MS	-	OE3 – Water Supervisory Unit - Municipal Utilities Department

The bargaining unit designation is indicated as the first two (2) digits of the position number and the grade.

III. Salary Provisions

The City Manager is authorized to make adjustments in classifications, including salary and benefit adjustments, to ensure comparability with similar classifications to maintain equity in the City's salary schedules as recommended by the Human Resources Department classification studies

CITY OF STOCKTON SALARY SCHEDULE

and reviews, and to incorporate changes into the Salary Schedule, as appropriate (City Council Resolution No. 2019-06-18-1502 dated June 18, 2019).

IV. Special Salary Provisions

The City Manager is authorized to fix the compensation of consultants rendering professional services, non-civil service grant funded positions, and part-time hourly employees rendering temporary service, when the City Manager deems necessary and in the best interest of the City of Stockton, provided that the compensation allowed does not, in the aggregate, exceed the total sum for professional and consultant fees in the annual budget of the City of Stockton, or funds granted to the City or by other political jurisdictions for projects upon which said professional or consultant is employed. Persons employed under these special provisions shall receive no fringe benefits except those mandated employer costs or as required by contract or grant specifications.

CITY OF STOCKTON SALARY SCHEDULE

V. Compensation Practices Other Than Base Salary

The Memorandum of Understanding for each bargaining unit and the Unrepresented Management/Confidential Employees' Compensation Plan contain sections dealing with specific pay provisions of classifications in that representation unit. Please refer to the appropriate section that deals with salary practices and compensation allowance other than base salary. Indexed headings include:

- Acting Pay
- Administrative Fire Captain Pay
- Bilingual Pay
- Call Back Pay
- Canine Handler Pay
- Court Appearance Pay/Off Duty Status
- Deputy Fire Marshal Pay
- Emergency Medical Services Dispatcher Accreditation Pay
- Emergency Medical Technician (EMT) Pay
- Explosive Ordnance Detail (EOD) Pay
- Field Training Officer (FTO) Pay
- Fire/Engineer Operator Pay
- Fire Intermediate/Advance Certificate Pay
- Fire Paramedic Certificate Pay
- HAZ/MAT Assignment Pay
- Holiday Pay
- Longevity Pay Compensation
- Motorcycle Officer Pay
- On-Call Duty Pay
- Overtime Provisions and Practices
- P.O.S.T. Supervisory/Management Certificate Pay (Police Management)
- P.O.S.T. Intermediate/Advance Certificate Pay (Police Unit)
- Professional Growth Pay
- Salary Provisions for Promotion/Demotion/Transfer/Reinstatement
- Special Assignment Pay
- Special Drivers' License Pay
- Standby Pay
- SWAT Pay
- Uniform Allowance
- Vacation Sell-Back

VI. Other Provisions

"Y" Rate - When an employee's job classification is changed to a lower paid job classification as the result of a classification study or other action, the employee may be placed on a "Y" rate. A "Y" rate means that the monthly base compensation for the employee shall remain in effect until such time as further changes in the salary range of the new classification exceeds the "Y" rate.

CITY OF STOCKTON SALARY SCHEDULE

VII. The Salary Schedule

Each position in a class is designated a **Position Number**. The position number is a combination of the Bargaining Unit Code and the Job Code.

For example:

<u>Bargaining Unit Code</u>	<u>Job Code</u>	=	<u>Position Number</u>	<u>Job Title</u>
15	715	=	15715	Office Specialist

Each position in a class is designated a **Grade**. The first two (2) numbers in a grade relates to the Bargaining Unit to which the position is assigned.

For example:

Grade

01	=	Unrepresented - Department Heads
10	=	SCEA - Professional and Technical Services
15	=	SCEA - Administrative, Clerical and Services

Refer to Section II. Bargaining Unit/Group Codes for additional unit designations.

The letter, part of the grade for the Professional and Technical Services Unit (10A, 10B, 10C), indicates the salary level.

In those represented units where there are more than twenty-six (26) classes, the grades have been expanded as follows: 10A - 10Z and 1AA -1AW, etc. The grade is compatible with information in the Payroll/Personnel Module of HTE system. Each grade contains five, six or nine salary steps.

VIII. The Salary Schedule Matrix - Monthly

Effective July 1, 2011, the salary matrix was eliminated for all bargaining groups.

IX. The Salary Schedule by Job Classification (to the nearest one-tenth of a percent)

Effective July 1, 2023, the Salary Schedule by Job Classification reflects a base salary increase of four percent (4%) COLA and Market Adjustment (Year 2) for affected classifications in the represented Firefighters' Local 456 Management Unit, to the nearest one-tenth of a percent, in accordance with City Resolution 2022-07-12-1206 adopted on July 12, 2022, and amended by Resolution 2022-07-26-1222 on July 26,2022.

Effective July 1, 2023, the Salary Schedule by Job Classification reflects a base salary increase of four (4%) COLA and Market Adjustment (Year 2) for affected classifications in the represented

CITY OF STOCKTON SALARY SCHEDULE

Fire Management Unit, to the nearest one-tenth of a percent, in accordance with City Resolution 2022-07-12-1206 adopted on July 12, 2022, and amended by Resolution 2022-07-26-1222 on July 26, 2022.

Effective July 1, 2023, the Salary Schedule by Job Classification reflects a base salary increase of four percent (4%) COLA and Market Adjustment (Year 2) for affected classifications in the represented Stockton Police Management Unit, to the nearest one-tenth of a percent, in accordance with City Resolution 2022-07-12-1206 adopted on July 12, 2022, and amended by Resolution 2022-07-26-1222 on July 26, 2022.

Effective July 1, 2023, the Salary Schedule by Job Classification reflects a base salary increase of four percent (4%) COLA and Market Adjustment (Year 2) for affected classifications in the represented Stockton Police Officers Association, to the nearest one-tenth of a percent, in accordance with City Resolution 2022-09-27-1207 adopted on September 27, 2022.

Effective July 1, 2023, the Salary Schedule by Job Classification reflects a base salary increase of a four percent (4%) COLA (Year 1) for affected classifications in the represented Mid-Management/Supervisory Level (B&C), to the nearest one-tenth of a percent, in accordance with City Council Resolution 2023-08-22-1210 adopted on August 22, 2023.

Effective July 1, 2023, the Salary Schedule by Job Classification reflects a base salary increase of a four percent (4%) COLA (Year 1) for affected classifications in the represented Stockton City Employees' Association (SCEA) and Unrepresented Management/Confidential and Law Employees' Compensation Plan, to the nearest one-tenth of a percent, in accordance with City Council Resolution 2023-08-22-1210 adopted on August 22, 2023.

Effective July 5, 2023, the Salary Schedule by Job Classification reflects a base salary and title change for the affected classification of Deputy Public Works Director/Solid Waste & Building in the B&C - Mid-Management Unit. The classification has been retitled to Construction Services Superintendent in accordance with the City Manager approved memo dated June 29, 2023.
