Project Info

Title

Storm Drain Zone 36/Zone 39 Improvement Project

Description

The proposed project intends to provide a regional drainage solution for Zone 39 and a mechanism to minimize increases in future flows discharged from Zone 36 to the French Camp Outlet Canal. The proposed project consists of a 66-inch gravity drain, storm drain pump station, 48-inch storm drain force main, and a river outfall to the San Joaquin River. The proposed project would be within existing and future City right-of-way, RD-17 property, and the OLWD wastewater treatment plant property.
