

Yosemite Mixed Use Conversion (Batched GPAs Site 5) Project Mitigation Monitoring Program

– May 2026

The California Environmental Quality Act (CEQA) and CEQA Guidelines require Lead Agencies to adopt a program for monitoring the mitigation measures required to avoid significant environmental impacts of a project. The Mitigation Monitoring Program ensures that mitigation measures imposed by the City are completed at the appropriate time in the development process.

The mitigation measures identified in the Initial Study/Mitigated Negative Declaration for the Yosemite Mixed Use Conversion (Batched GPAs Site 5) Project are listed below along with the party responsible for implementation of the mitigation measure, the party responsible for monitoring implementation of the mitigation measure, the milestones for implementation and monitoring, and a sign off that the mitigation measure has been implemented.

**MITIGATION MONITORING PROGRAM
Yosemite Mixed Use Conversion (Batched GPAs Site 5) Project**

| Impact Number | Impact | Mitigation Measure | Monitoring Agency | Implementation Schedule | Sign-off |
|-----------------------------|--|--|--|--|----------|
| Air Quality | | | | | |
| III-a,b | <p>a. Conflict with or obstruct implementation of the applicable air quality plan.</p> <p>b. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard.</p> | <p><i>III-1. The project applicant shall ensure that only electric hearths shall be allowed within any proposed on-site residences and that only zero-VOC paints, finishes, adhesives, and cleaning supplies shall be used during construction and operations of any future on-site development.</i></p> <p><i>Alternatively, future project applicants may provide the City of Manteca Development Services Department with proof of implementation of alternative mitigation measures, that show a reduction in ROG emissions such that emission are below the applicable SJVAPCD thresholds of significance.</i></p> <p><i>The aforementioned requirements shall be noted on all future development proposals and the informational sheet filed with any final subdivision map(s) and shall be provided to the City of Manteca Development Services Department for review and approval prior to approval of improvement plans for each future development proposal.</i></p> | <p>City of Manteca Development Services Department</p> | <p>Prior to approval of improvement plans for each future development proposal</p> | |
| Biological Resources | | | | | |
| IV-a | <p>Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service.</p> | <p><i>SJMSCP-Covered Species</i></p> <p><i>IV-1. Prior to commencement of any future on-site grading activities, the project proponent shall seek coverage under the SJMSCP to mitigate for habitat impacts to covered special-status species. Coverage involves compensation for habitat impacts on covered species through implementation ITMMs and payment of fees for conversion of lands that may provide habitat for covered special status species. These fees are used to preserve and/or create habitat in preserves to be managed in perpetuity. Obtaining coverage for a Project includes incidental take authorization (permits) under the Endangered Species Act Section 10(a),</i></p> | <p>San Joaquin Council of Governments</p> <p>City of Manteca Development Services Department</p> | <p>Prior to commencement of any future on-site grading activities</p> | |

| | | <p><i>California Fish and Game Code Section 2081, and the MBTA. Coverage under the SJMSCP would fully mitigate all habitat impacts on covered special-status species.</i></p> <p><i>Special-Status Plants</i></p> <p><i>IV-2. Prior to issuance of any grading permits for future development within the project site, focused surveys shall be performed by a qualified botanist in order to determine the presence or absence of any special status plant species. Furthermore, should additional plants having the potential to occur on-site be given special-status in the future, the qualified botanist shall also determine the presence/absence of such species. The survey(s) shall be conducted during the identification periods (bloom periods) for special status plant species that are known to occur in the project region. If special-status plant species are not found to be present during the focused survey(s), then no further action is required. The results of the focused surveys shall be submitted to the City of Manteca Development Services Department.</i></p> <p><i>If any special-status plant species are found, a mitigation plan shall be prepared in consultation with the City of Manteca Development Services Department. The plan shall detail the various mitigation approaches to ensure no net loss of the special-status plant(s). Mitigation could include, but would not be limited to, avoidance of the plant species, salvage of plant materials where possible, acquisition of credits at an approved mitigation bank, or acquisition and preservation of property that supports the plant species.</i></p> | City of Manteca Development Services Department | Prior to issuance of any grading permits | |

| Impact Number | Impact | Mitigation Measure | Monitoring Agency | Implementation Schedule | Sign-off |
| | | <p><i>Pallid Bat</i> IV-3. <i>In order to avoid impacts to maternity roosting pallid bats, future tree trimming or removal, as well as improvements to or demolition of existing abandoned structures within the project site shall be avoided during the maternity roosting season (April 15 – August 31).</i></p> <p><i>If future tree trimming or removal, or improvements to or demolition of existing abandoned structures must occur during the maternity roosting season (April 15 – August 31) within the project site, a qualified biologist shall conduct a pre-construction survey for maternity roosting bats within 14 days of the onset of these activities. Maternity roosting bat surveys shall include all trees and structures proposed to be impacted. Survey results shall be submitted to the City of Manteca Development Services Department. If active maternity bat roosts are not found within the survey area, further mitigation is not required.</i></p> <p><i>Should any active maternity bat roosts be discovered during the pre-construction survey in trees or structures proposed to be impacted, the biologist shall identify a suitable construction-free buffer around the maternity roost. An example of a suitable construction free buffer is 50 feet; however, each buffer distance should be determined on a case-by-case basis by the qualified biologist. The buffer shall be identified on the ground with flagging or fencing, and shall be maintained until a qualified biologist has determined that the tree and snag impacts would not adversely affect bat survival or survival of their young.</i></p> | <p>City of Manteca Development Services Department</p> | <p>Within 14 days prior to future tree trimming or removal, or improvements to or demolition of existing abandoned structures during the maternity roosting season (April 15 – August 31)</p> | |

|---------------|--------|---|--|---|----------|
| | | <p><i>Burrowing Owl</i> IV-4. A pre-construction survey for burrowing owls within the site and a 500 foot buffer surrounding the site shall be conducted within 15 days of future on-site construction. The pre-construction survey shall be conducted by a qualified biologist consistent with the CDFW 2012 Staff Report on Burrowing Owl Mitigation. If a lapse in future on-site work of 15 calendar days or longer occurs, an additional survey shall be required prior to reinitiation. A written summary of the survey results shall be submitted to the City of Manteca Development Services Department before any construction permits are issued. If burrowing owls or active burrows/refugia are not found, then further mitigation measures are not necessary.</p> <p>If an active burrow (i.e., a burrow occupied by at least one adult burrowing owl) is found, the project applicant shall implement the following measures:</p> <ol style="list-style-type: none"> 1. Avoid all nest sites that could be disturbed by Project construction during the remainder of the breeding season or while the nest is occupied by adults or young (including individuals or family groups foraging on or near the site following fledging); and 2. Establish and maintain a minimum buffer of 164 feet around the occupied burrow during construction. The actual buffer size shall be determined by the qualified biologist based on the time of year and level of disturbance in accordance with guidance provided in | <p>City of Manteca Development Services Department</p> <p>California Department of Fish and Wildlife (CDFW) if an active burrow is found</p> | <p>Within 15 days of future on-site construction activities</p> | |

|---------------|--------|---|-------------------|-------------------------|----------|
| | | <p><i>the CDFW Staff Report on Burrowing Owl Mitigation (CDFW 2012) and may be as large as 1,640 feet. Construction activities shall not take place within the buffer, and the no-disturbance buffer shall be marked on-site. Any modifications to the aforementioned buffer shall be approved by the City in consultation with CDFW. The buffer reduction request shall include relevant information and/or propose new measures to justify the buffer reduction. The buffer may be removed once the burrow is not occupied.</i></p> <p>3. <i>Burrow exclusion shall only be conducted during the non-breeding season for active burrows located within the site boundaries, and in limited instances within a buffer zone around the site, as determined by the City in consultation with CDFW after all avoidance and minimization measures have been exhausted. The Project applicant shall acquire an ITP from CDFW prior to exclusion. Following the ITP, any exclusion and burrow collapse activities shall be conducted in accordance with the CDFW Staff Report on Burrowing Owl Mitigation. The foregoing guidance requires a Burrowing Owl Exclusion Plan to be developed and approved by a qualified biologist in consultation with CDFW for the City's review and approval prior to burrow exclusion and/or closure.</i></p> | | | |

| | | <p><i>If nesting burrowing owls are found during the pre-construction survey, mitigation for the permanent loss of burrowing owl foraging habitat (defined as all areas of suitable habitat within 250 feet of the active burrow) shall be accomplished at a 1:1 ratio or at a ratio acceptable to the City. The mitigation provided shall be consistent with recommendations in the CDFW Staff Report on Burrowing Owl Mitigation.</i></p> <p><i>Nesting Migratory Birds and Raptors</i> IV-5. <i>If future development activities commence during the avian breeding season (February 1 through August 31), a qualified biologist shall conduct a pre-construction nesting bird survey within seven days prior to initiation of project activities. The survey area shall include suitable raptor nesting habitat within 500 feet of the project boundary (inaccessible areas outside of the project area can be surveyed from the site or from public roads using binoculars or spotting scopes). Pre-construction surveys are not required in areas where project activities have been continuous since prior to February 1, as determined by a qualified biologist. Areas that have been inactive for more than 14 days during the avian breeding season must be re-surveyed prior to resumption of project activities. Results of the preconstruction survey shall be submitted to the City of Manteca Development Services Department for review. If active nests are not identified, further mitigation is not required. If active nests are identified, the following measure shall be implemented:</i></p> <ul style="list-style-type: none"> <i>A species-specific buffer shall be established by a qualified biologist</i> | City of Manteca Development Services Department | Within seven days prior to initiation of project activities during the avian breeding season (February 1 through August 31) | |
