

**Annual Report  
Mitigation Fee Act  
City of Manteca Development Fees  
Fiscal Year 2021-22**

Government Code Section 66006(a) requires local agencies that require the payment of development fees to submit an annual report detailing the status of those fees.

The following is the annual report for the City's standard development fees.

**1. Provide a brief description of the type of fee in the account or fund**

*PFIP Water Distribution:* This fee is used to pay for pipelines, wells and test wells associated with new construction.

*PFIP Sewer Collection:* This fee is used to pay for pipelines, trunks, laterals, pump stations and lift stations, associated with new construction.

*PFIP Storm Drainage:* This fee is used to pay for basins, ditches, pump stations, canals, pipelines and lift stations associated with new construction.

*PFIP Transportation:* This fee is used to pay for development of portions of arterials traffic signals associated with new construction, sidewalks, access ramps, right of way.

*Water Connection/Surface Water Fee:* This fee is used to pay for the cost of connecting new development to the City's water system, and cost of securing surface water supply.

*Sewer Connection:* This fee is used to pay for the cost of connection of new development to the City's sewer system and to pay for increased treatment capacity of the Wastewater Quality Control Facility (WQCF)

*Government Building Facilities Fee:* This fee is used to pay for expansion of city-owned public facilities needed to accommodate new growth in the community. This fee represents only the new growth's impact on those facilities.

*Major Equipment Purchase Fee:* This fee is used to pay the financing of major equipment utilized by City departments. It is charged to new development to pay for new equipment needed as the community grows.

*Fire Facility Fee:* This fee is used to pay for the future relocation and expansion of the Fire Department station and related equipment, which will be needed as the community grows.

*Park Fees:* This fee is used to pay for the acquisition, design, improvement and expansion of new park and recreation facilities needed to accommodate future growth-both in the form of neighborhood parks and community parks.

**Highway Interchange Fee:** This fund has been used to construct highway interchange related improvements. The fee has been replaced by the Public Facilities Implementation Plan (PFIP) Transportation Fee. Funds remaining in this account will be allocated to specific projects that meet the fee criteria. Current Capital Improvement Program Projects CIP#11034 SR120/McKinley Interchange and CIP#19066 S. McKinley Avenue Southernly Improvement.

**San Joaquin County Multi-Species Habitat and Open Space Plan (SJMSCP) Fee:** This fee will be used to finance the goals and objectives of the SJMSCP that include land acquisition, enhancement, land management and administration of open space lands that compensates for such lands lost as a result of future development to the City of Manteca and in San Joaquin County.

**Agricultural Mitigation (Farmland Conversion) Fee:** This fee is used to partially mitigate the loss of farmland through conversion to private urban uses, including residential, commercial and industrial development. The fee shall be used by the City of a qualifying land trust to purchase agricultural mitigation land.

**Regional Transportation Impact Fee:** This fee is used to partially mitigate the impact of development on the Regional Transportation Network. Fees are used with other State, Federal and Local funds to make local and regional transportation improvements.

**County Facilities Fee:** This fee was established to implement the goals and objectives of the General Plan and to mitigate impacts caused by new development within the County of San Joaquin. The fee will be used to finance region-serving Capital Facilities located throughout the County that are used by the residents and businesses within the City.

**Flood Development Impact Fee:** This fee was established to allow a coordinated effort to reduce flood risk to the area. The fee will be used to assist in the financing of levee improvements and related flood risk reduction measures necessary to provide at least a 200-year level of flood protection to lands within the 200-year floodplain along the San Joaquin River.

**Solid Waste Cost Recovery Fee:** This fee was established to recover the costs associated with providing carts, bins and tucks required to serve new businesses and residents. The fee will be used to purchase, assemble, and deliver carts/bins/boxes to businesses and residents occupying newly constructed space.

## **2. List the amount of the Fee:**

**\*See attached Exhibit # 1 for a complete list of City of Manteca Development Fees**

- *PFIP Water Distribution Fee*
- *PFIP Sewer Collection Fee*
- *PFIP Storm Drainage Fee*
- *PFIP Transportation Fee*
- *Water Connection/Surface Water Fee*
- *Sewer Connection Fee*
- *Government Building Facilities Fee*
- *Major Equipment Purchase Fee*

- *Fire Facility Fee*
- *Parks Fee*
- *Highway Interchange Fee: \$0 Per new dwelling unit Repealed; Ordinance 982*
- *San Joaquin Area Flood Control Agency Flood Development Impact Fee*
- *Solid Waste Recovery Fee*

3. **List the beginning and ending balances for each Fund. Provide Public Improvements on which fees were expended and include the total percentage funded with fees. Provide an identification of public improvements that sufficient funds have been collected on incomplete improvements and provide a status update of these existing funded projects. In addition, identify FY 2021-22 public improvements to be funded by Fees collected.**

San Joaquin County Multi-Species Habitat and Open Space Plan (SJMSCP)	None
Agricultural Mitigation (Farmland Conversion)	None

Regional Transportation	None
County Facilities	None
Flood Development Impact	None
Solid Waste Cost Recovery	None

**7. Identify the purpose to which the Fee is to be imposed and demonstrate a reasonable relationship between the Fee and the purpose to which it is imposed and identify funding sources anticipated to complete financing of incomplete improvements identified.**

**PFIP Water Collection:**

The fees are to be used for those improvements outlined in the 2013 Public Facilities Implementation Plan Update which is available upon request. This funding source is anticipated to be sufficient to complete the financing of identified improvements.

**PFIP Sewer Collection:**

The fees are to be used for those improvements outlined in the 2013 Public Facilities Implementation Plan Update which is available upon request. This funding source is anticipated to be sufficient to complete the financing of identified improvements.

**PFIP Storm Drainage:**

The fees are to be used for those improvements outlined in the 2013 Public Facilities Implementation Plan Update which is available upon request. This funding source is anticipated to be sufficient to complete the financing of identified improvements.

**PFIP Transportation:**

The fees are to be used for those improvements outlined in the attached Exhibit 3. This funding source is anticipated to be sufficient to complete the financing of identified improvements.

**Water Connection/Surface Water Fee:**

The surface water fee is intended to reflect the proportionate costs of surface water supply capacity associated with South County Surface Water Project (SCSWP) agreement (C2020-13). The meter installation fee is intended to reflect the cost of installing meters and related appurtenances on new services. The water capacity charge is intended to reflect the cost of capacity in the existing water system that will serve the new customer. This funding source is anticipated to be sufficient to complete the financing of identified improvements such as SSJID Plant expansion.

**Sewer Connection Fee:**

The fees are being used for the construction of the WQCF Phase 3 Upgrade and Expansion Project needed to expand the treatment capacity to 9.87 mgd to serve new development, upgrade existing facilities and to comply with wastewater discharge requirements. In addition, a WQCF Phase 3 Completion Charge will be assessed as outlined in Ordinance 1411 The fee has been calculated based on the number of connections for residential units, and the number of drainage fixtures for commercial, industrial and institutional facilities. The number of connections

helps to determine the maximum amount of sewage that would be generated at those points and, thus, measure their impact on the overall system and future capacity needs.

### Government Building Facilities Fee:

The fees are to be used to pay for future expansion of City-owned public facilities needed to accommodate future growth. The fee has been calculated based on the number of dwelling units for residential uses, and based on the square footage for commercial, institutional and industrial uses. The number of units and square footage help to determine the average number of residents and employees that would be generated at those points and, thus measure their impact on future facility's needs.

### Maior Equipment Purchase Fee:

The fees are to be used to pay for the acquisition of major vehicles and equipment needed to accommodate future growth. Actual uses of the funds are determined each budget year based on highest priorities. The fee has been calculated based on the number of dwelling units for residential uses, and based on the square footage for commercial, institutional and industrial uses. The number of units and square footage help to determine the average number of residents and employees that would be generated at those points and, thus measure their impact on future equipment needs. In addition to seeking grant funding and State assistance for public safety-related major equipment, the City will seek additional contributions through development agreements to help pay for additional major equipment.

### Fire Facility Fee:

This fee will be used to pay for the future relocation and expansion of the Fire Department stations and related equipment, which will be needed to serve new development throughout the City. The Fire Facility Fee, which became effective in 2012, is assessed to all new residential and non-residential development based on the square footage and type of the new development and on identified needs for increased fire service to serve future development, including facilities and equipment.

### Parks Fee:

The fees are to be used to pay for development of neighborhood and community park facilities to accommodate future growth. Fees are used for park improvements as development is identified throughout the City. The fee has been calculated based on the number of dwelling units in new residential developments. Residential development has a direct impact on parks facilities because residents use parks on a regular basis for passive and active recreation. The number of residential units will determine the population to be served and these developments will pay their share of park improvement costs based upon existing parkland standards and estimated population to be generated. The fee became effective in November 1999, updated in 2017 and is adjusted each year by ENR. The City will continue to seek supplemental grant funding for park improvements, such as tree-planting grants. In addition, the City will consider the use of Federal Community Block Grants and contributions through development agreements to help pay for the development of City parks where possible. Partnerships with local service and non-profit organizations, as well as the Manteca Unified School District, will also be pursued.

### Highway Interchange Fee:

The final balance of these fees was used to pay for the widening of Union Road between Wawona Street and the Yosemite Avenue/Highway 99 Interchange Improvements. Any residual balance will be assigned to another project that meets the intent of this fee. This fee has been replaced with the PFIP Transportation Fee.

The fee has been calculated based on identified highway interchange improvements affecting Highways 99 and 120, compared to the number of residential dwelling units anticipated to be constructed. This fee was subsequently recalculated as part of the PFIP's Transportation Fee.

### *San Joaquin County Multi-Species Habitat and Open Space Plan (SJMSCP) Fee:*

The fees will be used to finance the goals and objectives of the SJMSCP that include land acquisition, enhancement, land management and administration of open space lands that compensates for such lands lost as a result of future development to the City of Manteca and in San Joaquin County. The fee was calculated by the San Joaquin Council of Governments (SJCOG) based on the type of habitat land proposed for development and the estimated cost to replace the habitat land. This funding source, when combined with similar fees collected from other jurisdictions throughout the County, as well as from grants and foundations, are anticipated to be sufficient to complete the financing of identified projects.

### *Agricultural Mitigation (Farmland Conversion) Fee:*

This fee is used to partially mitigate the loss of farmland through conversion to private urban uses, including residential, commercial and industrial development. The fee will be used by the City or a qualifying land trust to purchase agricultural mitigation land. This fee is adjusted annually based on the ENR Construction Cost Index based on a Nexus Study by South San Joaquin Irrigation District. This funding source, when combined with similar fees collected from other jurisdictions throughout the County is anticipated to be sufficient to complete the financing of identified projects.

### *Regional Transportation Fee*

This fee is used to mitigate development impact to the regional transportation network. The City retains 75% of the fee to mitigate development impact for projects identified in the Regional Transportation Plan. 15% is remitted to the SJCOG and 10% is remitted to the County. This fee was originally calculated by the San Joaquin Council of Governments (SJCOG) based on the Regional Transportation Plan and is adjusted annually to fund improvements required to serve new development to ensure existing service levels can be maintained. Projects are listed in the Regional Transportation Plan found online at [www.sjcog.org](http://www.sjcog.org). This funding source, when combined with the PFIP's Transportation Fee, Regional funds LTF, Measure K and other funding sources is anticipated to be sufficient to complete the financing of identified projects.

### *County Facilities Fee*

This fee is used to fund capital facilities in the County related to growth. The fee is calculated by and passed through to San Joaquin County. This fee is calculated based on a nexus for countywide facility's needs. This funding source, when combined with similar fees collected from other jurisdictions throughout the County, as well as from grants and foundations, is anticipated to be sufficient to complete the financing of identified projects.

### *Flood Development Impact Fee*

This fee was established to allow a coordinated effort to reduce flood risk in the area. The fee will be used to assist in the financing of levee improvements and related flood risk reduction measures necessary to provide at least a 200-year level of flood protection to lands within the 200-year floodplain along the San Joaquin River. This fee is calculated by San Joaquin County based a nexus for countywide protection of lands within the 200-year floodplain along the San Joaquin River. This funding source, when combined with similar fees collected from other jurisdictions throughout the County is anticipated to be sufficient to complete the financing of identified projects.

### Solid Waste Cost Recovery Fee

This fee was established to recover the costs associated with providing carts, bins and trucks required to serve new businesses and residents. The fee will be used to purchase, assemble, and deliver carts/bins/boxes to businesses and residents occupying newly constructed space. This funding source is anticipated to be sufficient to complete the financing of identified improvements.

***Note: Capital Improvement Projects can also be found in the City's Adopted Budget Book.***

### CITY OF MANTECA DEVELOPMENT FEE SCHEDULE

Values listed reflect the rates in effect at the time of publication and are subject to change without notification.

Effective July 17, 2023

<b>Storm Drainage PFIP Fee: Public Facilities Implementation Program Fees (rates effective 1/1/23, per Resolution No. R2013-31)</b>								
Development fee to pay for storm drainage pipelines and channels. This fee is charged when a parcel of land is paved over or built upon, as for a commercial development, or for each home within a subdivision as it is built. Water that would have been absorbed into the ground is now runoff that must be handled by the City's drainage system. This fee does not apply to new construction on a site that is already paved (for example, existing buildings were demolished and are being replaced).								
Land Use	Zone 30	Zone 32	Zone 34	Zone 36	Zone 39
